K Williams, E. 1737.(2)

OCCULT IN PHYSICK,

OR

The three principles in Nature Anotomized by a Philosophical operation, taken from Experience, in three Books.

THE

First of BEASTS, TREES, HERBS, and their Magical and Physical Vertues.

THE

Second book containeth most Excellent and Rare Medicines for all Diseases happening to the Bodies both of Men and Women, which never yet saw Light; An Incomparable Piece.

THE

Third and Last Book, is a Denarian Tract, shewing how to cure all Diseases with ten Medicaments; And the Mystery of the Quaternary, and Quinary Number opened; with a Table shewing the Suns Rising, Setting, Hours of the Day, Hours of the Night, and how many Minutes are contained in a Planetary Hour both Day and Night; with a Table of the Signs Continuance on the Ascendent, sitted for Magical Uses; As Garhering of Herbs, Roots, and the sike with their Uses.

WHEREUNTO

Is added a necessary Tract, shewing how to Judge of a Disease by the Affliction of the Moon, upon the fight of the Parients Urine, with an Example; Also you are taught how to Erect a Figure of Heaven for any time given.

By W. W. Philosophus; Student in the Califical Elparal Sciences.

Mer, at the Palm-Tree near St. Dunftans Church in Fices fixee; \$660.

TIUDOO DIEYE

Inerince principles in Nature Anotomized by a be solophical operation, taken ment spens ence, invince Books.

THE Mill of BEASTS, TREES, HERBS bas . their Magneal and Physical Verluer.

Second book containers well excellent and Rare Medi-cines for all Diseases happening to the Bodies both of Men and Women, which never years why An Incomparable Piece.

Third and Last Book, is a Densilan Track, thewing how to cure all Difeafes with ten Medicamenes; And the Mythery of the Quamernary; and Quinary Nember open d; with a Table faceing the Sans Refine, Sering, Hours of the Day, Tions of the Night, and how many Minutes are cutrained are Planetary Hour both Dayand Night; (with a Table of the Signs Continuance on the After in, titted for Magical thee; As Cardioring of House, Roos; and the file with their till .

WHEREHMTO is added a necessary Track, showing low to Indge of a Displement of the Patients things, with an Translo, Alexand are taught haw to Hiede a lagare of Heaven locativ the given.

To the Truly Vertuous, and most Honored Collonel, Daniel Pudzee, Esq;

Most worthy Sir,

IT Hen first I entred upon the Composing of this Subjest, I had almost concluded the concealing hereof; But after a due poise, and some deep reasonings with my self, I consented to the publishing hereof; and knowing your Worthynesse, and Ability in this Subject, Ishall first Crave pardon, and Humbly intreat Admittance, to prefent this tender Babe unto your Judicious Patronage, not doubting but that your Candour, and most Noble Quality, will descend so as to acquit me of my presumption, Seeing I have made my felf a Transgressor by my bold Attempt. Worthy Sir, I confesse I need not acquaint you of what Nature and Operation a Divine Mind is of, or bow neer it imitates its Original inits AEIs, and with what Freedome and Liberality it doth demonstrate it felf, that it by its felf, cannot Erre from its own dignity and Central vertue, deth always Thir.k

The Epistle Dedicatory.

Think, Doe, and Operate somthing like, and worthy of is self. All this through the blessing of God & the gift of nature, but happened in full anto your for who but more neglected the vulgar operations of the Elements upon his nature than your self, and bath applyed your self unto the most profound and most prositable Sciences? and not only so, but you are much like Mother Nature, in procreating, and contributing to the insurant weak ones, Gratis. Kind Sir, I befeech your Pavour not to blame me for speaking the truth, I do it on purpose that others may entertain a good mind, and take you for an example; for I wish with Moses, would to God all Gods People were found Prophesying, or doing good; that our Harmony may be encreased, Ge.

Sir, the reason of this Dedication is this, those so many inseparable merits in you, which appear in my sight, are worthy of all Godly Commendation, and more than Humane Estimation; seeing you cease not your most ingenious Labour, in searching after the Radix of these most worthy Sciences of Physick, and Philosophy, with their Essences. Therefore I think it best to apply my self with this small work of mine to one Learned, wise, and Honest, who doth both Love and Understand the Direct of this Divine Mystery, God in Nature producing all things according to its own Species, and not to trul it in the hand of one who is ignorant of the Sublimity bereof.

Sir, I judge it needlesse to acquaint you with the ultfulnesse of this work; as being such, whereby Wise Mu

The Epistle Dedicatory.

may Learn the possibility and vertue of all things growing in the Vegetable Kingdom, as Trees, and Herbs, and something of the Animal, as Beasts, both Magical and Physical, all which tends to the Health and Profit of Man-kind.

worthy Sir, it is not questioned, neither will it be doubted, but that this weak work will gain a freer Current through the world, being stampt with your generous name, and this labour will bear the better lustre upon it being juch a stranger in our times, who happily will want the assistance of you so able a Personage, to both defend and conduct it to its true period, and all the way without question will find the better entertainment, and be the

more welcome to every good mans hand.

Know DEAR SIR, far be it from me to make your name a refuge to my defects, to escape my self, therefore I shall only aim to make the best of what you shall find in this book yours, and not to add any thing to decline your worth: All that I have to Glory in is, that by Providence, so worthy a Person both in Learning and Knowledge was thought upon, whose Judgement is ripe, and understanding is seasoned with a farr higher degree in this Art, than what is here laid down, therefore bleffed be God on my part. You most worthy Sir, are the fittest both to Protest and Judge hereof. Truly Sir it do h not alittle trouble me, that Nature hath been no more Libevalto me in Terms of Expression, to demonstrate my thankfulnesse, in hopes of your good will, if you shall please to vouchsafe the Acceptance of this, as a Testime-

The Epiftle Dedicatory.

ny of the Honor I bear unto your vertues, which will be an attribute too honourable, and not besitting my weak Genious, yet well-pleasing as from the sweet and radical aspects of your Honours savour. But because many words may be a cause, as often it doth, of suspition of dissimulation of statery, both which I ever hated, I shall, according to the monted Custom of a wise State, to elect one in chief, and be the most wise and most honest, for the Protection of their Councels, I shall commit what you are most worthyly worthy of, is it were the most accomplished, to your most gentle tuition; wishing you all temporal selicities in this life, and the fullness of the unity of God in that which is to come, and shall in the unity of Jesus Christ and a Cordial assection subscribe my self, SIR,

Your most Humble Servant, Will. Will.

or would be the Acceptance of the best of the

To his Honored Friend Mr. VVIIliams on his Occult Physick,

ts

e

d

O Speak in commendation of this Incomparable Peece is an Herculean work; But yet the Peece it self can, and doth do it. Yet because they which receive much cannot but declare much, though not enough, This therefore I may compare to the Body of Physick, as Phil osophers compare Man to the World, a Microcosm, whereby as in a Glasse every essential part of Physick is seen to be composed; An Artist may behold the threefold conjunction of the parts of Man to contain the Soul, Body, and Spirit: The same congruity is couched in this Occult Physick (viz.) Magical, Physical, and Artificial, which is a compleat Body of Physick; the right understanding of which, is only by those that contemplate the Heavenly Bodies, and their Influence on TerrestrialEssentials. Therefore Dear Friend, let Ignorance despise thy Labour, and spare not: But Wisdom is Justified of her Children, and they rejoyce to fee their Mothers Face to shine. Therefore Dear Friend bring forth of thy flore things both New and Old, and be not weary of well doing.

So Prayeth thine in all Affection

John Goodes,

Student in Astrology.

To the Ingenious Reader.

I Have for the Publique good, attempted this Antient and most Honourable Sabject; the publishing bereof, will subject my pains, and
this long Experience to the common Censure of all mens Opinions; but
knowing that the taste differs according to the predominating humour in
every one (viz) some love the sowr, some love the sweet some the bitter,
some the salt; So I doubt not but there will be some amongst the most
Sober that will accept of this small Fabrick, wherein they will find
many secret Closets; in which are lockt up many pleasant things but
for the Diseases of Body and Mind, if you have the right Keys bereof;
(viz.) the understanding of the matter berein contain d; to which
purpose, read with pleasure the third Book. Having no place to descend
to particulars, I shall desire the Students in the first place to Correct
the Errataes, which I hope are not much material, but will admit of

an Excufe.

Secondly , Let Practicioners understand , that the bigbest Dose is fet down in many of the Purging and Vomiting Receipts; therefore let them be administred in the Dose according to the Age and Strength of the Patient and Humour offending, and fo thou fhalt do well. Reader, the building is but small, therefore it would be very improper to add any more to the porch bereof, but thou art defred to walk in and delight thy felf in the best Rooms, and if thou findest any thing therein that pleafeth thee, thou art to take it for thy venture; I (hall only add. in this place a Medicine Compound, of great effett to keep the Body in bealth, and the Humours from Putrefaction, it is good egainst the Fume, of which Discase you will find in the second Book; its Dose is from five drops, to so much as will make a draught of Ale, or other convenient Liquor Tart : it kerps down the Vapours from the Brain , in freating and faint walkings, it's to be used sometimes, and only in Summer time. Take Oyl of Vitriol, and Tineture of Saffron, of each two Drems, Syrup of Red Poppies, a few Drops, to bring it into a Balfomique Body. This I shall give to the most Hon ft and wife in this Art to judge, if it be thus taken, whether it will not prove as I have faid; nay and much more effectual, than many others.

Now if thou shalt accept kindly of what I have done, thou will give me cause of higher thoughts; but this I will assure thee, in what I have done, I have been as faithful as it is possible for a mortal Man to be. So I shall referr thee to the work it self, and shall wait an op-

portunity to jerve thee.

Will. Will,

ADD ITIO.

Bierve these few things which ought of necessity to be understood.

First rom what Planet the or Lord of the Ascendent or the Lord of the hour did last seperate; for that, Planet shall signifie what hath already happened to the Querent, as the application of one or more of them shall fignifie that which is to happen to the Querent, always observing what House that Planet is Lord of, or. placed in, from whom one of the aforefaid fignificators. shall either seperate from, or applie to. As for example, a planet is said to seperate when he is departed from another but 6 minutes distance, and so continuing their orbs, understand the same of one planer applying to another, as in our figure you have D seperated from a square of han infortune, and applying to the conjunction of 1 a fortune, both within their orbs. And as) is seperated from h but one degree and 30 minutes, or there about, at the time of fetting the figure, and Saturn placed in the fixth House, which is the House of fickness, and h being Lord of the 8th House, which is the House of death; signified that he was dangeroutly fick and only affraid of death, and as) applyed to

is

er

in

cb

285

ve

pile

it I

op-

ill.

4 in the 4th House, which fignifies the end of things and he a fortune also, governing the 7th House, which signifies the Physician, and being partly Lord of the ruth the House of hope, and rel ef, all which signifies

a good end of the cure.

This Rule must be thus noted in like manner of all the Aspects, which are five in number as a conjunction dis when two planets are in one fign, degree, and minute. A Sextile is when one planet is distant from another fixty degrees, marked thus, ** a square aspect is when planets are distant ninety degrees marked thus, Da trine aspect is when planets are distant one hundred and twenty degrees \$\triangle\$ planets are in opposition when they are distant one hundred and eighty degrees, written thus, \$\theta\$.

These aspects are evil, if joyned with evil, as the Ds

d, D, or &, with h, & or O.

These Aspects are good, D joyned by 6, *, or A with 4, 2, Venus or O the better if they shall be in good places of the figure and in their own dignities, and in reception by House, or exaltation; these positions signific good in all cases.

Secondly, you are to observe that if the 3 Significators, or one of them therin shall be combust, or going to combustion, it signifies much evil to the querent, or party sick.

These 3 Significators are the Lord of the Ascend. the Lord of the hour, and the D. I adde the light of time, (that is) the © by day if the figure be set by day, and the D by night if the figure be for that time. A planer is combust when he is not distant from the © more than 8 degrees 30 m. either before or after, but if after it figurifies the evil is going over.

Thirdly, a planet belieged betwixt hand & lignifies from one evil to another, the planets orbs in degrees and minutes, h 10, 4 12, & 7, 30 © 19.

Of the Unicorn.

k or Bolly.

The Hoof of the Unicorn is better than his Horn, and being worn about a man in any place, no infection

ction can have power on him; yet the Horn is very pretious also, and being so worn, it cureth the Falling sicknels.

Of the Bever.

Take the tongue of a Bever dried, and now and then smell unto it, and it will cure the Apoplexy. And the Stones of the Bever dryed, and so much of them as a hazel Nut scraped in Vinegar, and so steeped 24. hours, then put the Vinegar in a dish upon coals, where it may vapour, and the sume thereof being taken into the nose and mouth, doth cure the Megrem, and all pains of the head; also it cureth the Mother.

Of the Mole or Want.

The bones of a Dog Want sewed up in silk, and worn about the neck, causeth a woman to conceive.

Of the Badger or Gray.

Take the blood of a Grey new killed, and wash your hands in it, and smell to it, and it will cure you of the Squinancy. It cureth also Scabs and Itch.

Of the Hare.

The Heart of a Hare dried, and worn about the neck it cureth the Cramp, and drunk in Wormwood-water it cureth all the Worms in the Stomack or Belly.

ur he

الز

0

Of the Marten.

Take the skin of a Marten and burn it, then take the ashes, and steep them in White Wine, or Water, and throw it upon an Adder or Toad, or any such like worm, and they shall die immediately.

Of the Tortoife.

Take the shell of a Tortoise Egge and wear it about you, and all that while you shall never have desire of Venery.

Of the Camel.

The hair of the back of a Camel burned to ashes hops all bleeding presently. Also his Teeth being worn by a woman, makes her to have her natural Courses.

Of an Affe.

The Tongue of a Hee Ass that was gelded, being dried and worn about the body, doth stop bleeding immediately, causeth a wound to sodder and cloze very strongly.

Of the Hedge-Hog.

Take the skin of the Hedge-Hog, and let it be made like a night-cap with the prickles, and put it on the fick bodies head, that therein is pained, it will procure him take and make him sleep well.

Of the land Toad

Dunghill, there let him lie, and the Ants will consume the flesh; in the head you shall find a thing like a stone, great or little, the which being set in Gold, and worn about a man, it doth give him warning of any mischief or ill to him that weareth it, by changing colours in divers manners.

Of the yellow Frog.

Take him, and cut off his head and dry it, and being worn about a man or woman, it causeth the party extreamly to sleep, it also settleth the brains of such as are light headed, but it maketh the party Spur-blind so long as it is about him.

Of the Otter.

Make gloves of his skin, and being worn, it healeth the pain of the Gour in the hands, and taketh away the Cramp from all parts of the body.

Of the Hart.

Take the Horns of a Stag in a velvet head, and scrape off the skin or vilm, and dry it to powder, and being worn by a woman in Travel, it causeth speedy delivery. It is a very wholsome thing to be taken inwardly, it kils leth all worms, and cureth the Spleen and the Mother, it purgeth the Liver, it stoppeth the flowing of the Seed.

Seed. The Dose is one dram in white wine,

The Horns of a Stag killed in October, and being dryed, one dram thereof taken doth cause one to vomit.

The Horns of a Stag in May have thrings much like Worms, but are not Worms, yet let them be Worms or not, dry them to powder, and drink a dram thereof

in Mulcadine, it killeth any worms in the body. " O' DO

The bone of his Heart being worn about one who hath the Falling sickness, cureth him in a short time. It cureth the Passion of the Heart, and is a very wholsome thing. And being taken for a Funie, doth cure the Mother, and the sume of it purgeth also.

A genera! Medicine to be made of the Stag.

Take of his Horn finely scraped one ounce, of his vilms of his velvet head half an ounce, of his Brains dryed, lest in October, half an ounce, of the bone of his Heart one simple, of his Pizzel, being dried, three drams, of his Hoof some drams; put to this one pint of white Wine, then boil it is aviose Decoction, after that distil it, then burn the Peces, and make thereof a Salt, and put that Salt into the Distilled Water. The Dose is half an ounce.

This worketh all the Effects aforesaid, and is good

for many Diseases more.

Of the Row-Buck.

Take the Horns of him and make Beads thereof, and wear them about your neck, or wrifts, it causeth conception. And if a man weareth the same, he shall not have his natural course of Seed, though he lie with a woman.

Of

Of the Lion, Nothing of good observed.

Of the Civet Cat.

The skin being finely drest and made into a Stomacher and worn, it expelleth all pains from the Heart immediately; and being bound about a womans Thighs, causeth speedy delivery.

Of the Squirrel.

Take his fore teeth and wear them, and you shall neyer be troubled with the Cramp.

Of the Water Rat.

Take his skin and dry it, and dre is it as a Futre, and being worn about a woman it cureth the Mother. His bones beaten to powder do the same thing being drunk. And it stops the Urine of them that have no Retention, and whose water goeth from them by day and night.

Of the Viere.

Take a live Viere, and geld him, take his Stones, dry them to powder, and lay them on the breast of a man when he sleepeth, and it will make him dream fearfully, and to groan and weep. And if it be drunk it chreth the Whites in man or woman.

Of the Dog Fitcho.

Take a Dog Fitcho, and roast him with his belly full of Cumminseed, and take the grease, which will not be much, and put it into a little Box, and sew it in a piece of Silk, and wear it about the Neck, and no insection can take hold on you.

nk

about the neck, it cures the shaking of the head and Megrim. The Salt of this trees Bernies being drunk in white wine cureth all inward Ulcers, and forceth the Imposshumes to break outwardly. It cureth the griping of the Belly, and scourers the Reins. They must be gathered in June, July, or Angust; and this Salt must be mingled with three or four grains of Bezar. The Dose is one dram with the Bezar in white wine.

The Pine Tree bollinin : Nig ed bos

The Pine Apples being gathered when they are full tipe, the kernels being worn by any, the faid party shall have no Lice about him.

The same do cause a Woman to have her Terms. The sain of Pine Apples is an excellent Medicine for divers things, especially for the Stone and Strangury.

Forthe Gour Olis live al

Take green Pine Apples from the Tree, fix of them, and powder them, and put to them a quart of the spirit of megar, one pint of Sallet Oyl, boyl them exceeding well together, then strained, and let thus many front twelve hours, then take off the Oyl from the top, then put to the Oyl me spoonful of the jugge of Warmwood, and of the payer of thus one spoonful, the jugge of the strongest sarraw are housed, four spoonfuls of Honer, two morces of war, two mices of stone Pitch; Boyl all these together will it cames to his height for a Sore-cloud, the which apply to the Gant, made will immediately take army the pain, and dissolve the hole.

Of

Of the Orange Tree.

Take the leaves of the Tree and carry them in a little bag bound to the Navel, and it will cause a woman speeduly to conceive, and also to keep in the conception of child. The same leaves powdered and drunk in white Wine cureth the Green Sickness, and stoppeth the over-slowing of the Seed. The juyce of Oranges pounded, and the pills distilled is very good for the Stone, with Fennel seed, Pasley seed an ounce, of Dill seed half an ounce.

Of the Nutmeg Tree.

Take a Nutmeg that hath the Mace on him, and sewing in a linnen bag, and bind it about a womans Leg, and such another to the Navel, and it will cause her speedy delivery. It will also cure the Squinance if it be worn about the neck. The rind of this Tree boyled in fair water and drunk stopeth all kinds of Fluxes.

As excellent Medicine for the running of the Reins, the Whites in momen, all Fluxes, the Green Sickness.

Take of Nutmegs pounded balf a pound, put to it one quart of Sack, one pint of Slow water, boyl this in aclear Decoction, then strain it, then put to this liquor on sunce of Cinnamon, rinds of Pomegrawates one ownce, Mate one dram, boyl it again, and strain it very bard, and give three spoonfuls of it warm, and it will cure the said Difects.

Of the Pomegranate Tree.

Take the juyce of a Pomgranate, and one part of the kernels, and of Rose water two parts, and put it together, and give it to a young Child who sucks, being sweetened with sugar, it doth firmly knit the Navel, and keep him from a Rupture; but this said juyce and ingredients must be first twice distilled.

An excellent Medicine for a Rupture in the belly of old or young.

The one pound of Pomegranates bruised rinds and all, and put to it white Wine one quart, Plantine water one pint, earth-Nuts a quarter of a pound, Bonewort Roots, and Salomons Seal, of each one quarter of a pound, if you cannot have these last roots, then put in a quarter of a pound more of Bonewort Roots, and add to it one pint of Rose water, boyl all these in a close Decostion, and after that distil it in Balneo; and this doth cure any Rupture. The Dose is four spoonfuls.

Of the Balfamum Tree.

The Rind of the Balfamum Tree is of great force, for being worn about the Neck, it maketh a man blind to fee again, so that the eye be clear and full. It taketh away a Pin and Web in the eye in continuancy of time.

An excellent Medicine for the Dropsie.

T Ake four ounces of Balsamum, and put it into a skillet, and put to it one ounce of Diagredium, Rhenbarb in powder

powder half an nunce, Catapasie in powder ten grains, Gum Drugon half an ounce; mix these together, and boyl it to a height and it will make Pills. The Dose is one scruple. This will give ten or twelve stools to any one that have a Dropsie, and will cure it absolutely.

Of the Lemmon Tree.

Take a green Lemmon and wet it in Wine Vinegar, and sew it in a bag, and bind it to the nape of the neck, and simmediately it stayeth bleeding. The juyce of Lemmon being dropped in a green wound, doth imme-

diately stop the bleeding.

Take the juyce of Lemmons and diffil it with Coppecas, equal parts or weights, it maketh a Water that will care all wounds, it purgeth the Liver, and purifieth the Blood, it cureth the white Scurf, I mean the juice of Lemmons does this.

A Medicine for the Gout.

Take a Lemmon and bruise it, and put to it a little Vinegar, that is, one spoonful, and one spoonful of Neats-foot oyl, four spoonfuls of Wheat slower, one spoonful and an half of oyl of Tartar, mix all together in the form of a Poultice, and apply it to the place, and this will take away the pain in three bours.

Of the Sassafras Tree.

This is an excellent Tree, and of divers Vertues, his Medical Vertues are by his smell, and that is for the Medical, and such like pains of the head, and most excellent

cellent against the falling Sickness. The Decoction of Sassafras is a great dryer, it cureth the Rheum; the Salt of it is a very excellent thing for many Diseases, but especially for Morbus Gallicus.

The Dose is half a dram in Butter to be taken in a Pill

or two

For making the Salt thereof the Rind is the best.

The First Medicine of Saffafras.

Take one pound of Saffafras thin sliced and dried in an Oven, then beat it to powder, and take as much Nutmegs made into powder, and mingle both together, and in
the morning fasting, arink it with a little Ale, it cureth the
Cough of the Lungs, and the Ptysick, and it is an excellent opener of the Stomach. The Dose is one dram.

The second Medicine of Saffafras.

Tapottle of the best Sack, and boyl it in a close Decotion, then strain it, and put to that liquor China three ounces, I singlass two ounces, Pomegranate Rinds two ounces, Anniseeds one ounce, Liquorice and Cinnamen two ounces, boyl this again in a close Decoction, then distil it is the strongest Balneo. The Dose is four spoonfuls. It cureth the Rheum or Pax, and stoppeth the Running of the Reins, the Whites in Women, scouteth the Kidneys, and is good for divers things,

The third Medicine of Sassafras.

Ake a pound of Saffafras made into fine powder, and put to it of Angelica and Fennel half apound, Rheubarb an ounce and a half, Diagredi half an ounce, Senna two-ounces, Polypodium two ounces, Epitamy and Sticadoes one ounce, Annifeed and Fennel seed two ounces, and put to all these three quarts of Rose water, then boyl it in a close Decoction, then strain it, and put Sugar to it, and make thereof a Syrup. The Dose is three ounces. This is a good Purge, especially for the Pox, Dropsie, and diverso-ther Diseases.

The Salt of Sassafras cureth the Pox, the Inflammation of the Liver, the Stone Pox, or Pock of the Lungs; it is excellent for the Stone, being diffolved in white Wine, and cureth the Piles and Hemorrhoids the place being washed therewith; also it cureth Ulcers, Pock sores, Cankers, Fistulaes, Botches, and especially a Noli me tangete. The Dose is

from half a Dram to a Dram in white Wine.

Of the Yen Tree.

The Berries of a Yew Tree dryed, and worn in a little bag about the Neck, doe help the trembling of the Heart, and is good against the Kings Evil, and stayeth bleeding at the Nose; one dram of the powder of them being taken in drink doth stop Fluxes, the Running of the Reins; also it cureth the scalding of the Urine.

I Ake the Salt of the Yew Tree, and put it into an Oval Glass, and put to it the spirit of Vinegar, an equal proportion of each, then set it in the strongest heat for four days, then indicto a Sale again, and then it is an excellent Medicine in divers Discases, especially for the Pox, the Leprosie, the tedness of the Face, burning of the Liver. It also enfects all pains, it buth a parging quality by woording Urine, is is a great enemy to the Stone in the bladder, cureth Alcers in the Tard, and is a great preserver of the Kidneys. The Dole is half a Dram in sweet Wine.

An excellent Medicine for the fretting of the Guts, and to kill Worms in the Stomach and Belly.

The one pint of new Milk and boyl it, then take off the Cream, and put one dram of the salt of the Tew Tree to it, and add two drams of Manna, and of Mummia half a dram, and drink a good drampht of it.

Another for the Laprofie.

Ake a Bath of the Yew Tree only in common Water, boyl it, and put it in a Tub for adry Bath; this sweat doth care the Leprosie and the Pox, and maketh the body clean, causing the Scabs and Scurff to fall, and the very skin also to pill and fall off, so that it cleanseth the whole body,

Another.

Take the grounds of Ale seven or eight Gallons, and put it into a large Kettle, then take six pound of the Yew Tree leaves and cut them small as herbs to the pot, and put it into the said grounds of Ale, then put into it three quarts of the strongest Vinegar, two handfulls of Bay Salt, boyl this well together, and when it is so cold that a man may suffer

59

serves, and socover himseloss, and let him sit there an hour a two, it will soak and take away the pain of the Gont, and dissolve the said knobs, and take away all the aches of the Logs; it will core the Megrim, and all the pains of the Flead; it maketh women have their Courses, if they cover to with a Sive, when it is very hot lay cloaths on it to keep the feet from scalding, so cover them all round and speak well.

Of the Lime Tree,

Take a piece of a fingers bredth of the bigness and square of the timber of this Tree, and if any one be hint or bleed on the Nose, write his name on one fide of the stack, and on the contrary side the Character of O.R. then burn the slick, and it ceaseth bleeding immediatly.

His leaves being gathered in the bud and distilled, make an excellent Medicine for the Strangury, and Con-

sumption of the Kianeys.

An excellent Medicine for a burning Fever.

The species of the mater of Lime Tree, and put to it four concess of French Barley, boyl it in a close Decolion very well, then put to it a quart of new Milk, of Borrage leaves three ounces, of Stramberry leaves three ounces, of Dandelyon, and Milk Thistle three ounces; boyl this in a close Decolion, then distill it in Balneo. The Dose is three spoonfuls.

Of the Quickbane Tree, or wild Aft.

Take a chaler of Quickbane Tree berries green, and convey

20

to

bo Fa

the lut

The

convey them about the party suspected to be a Wirch,

and then examine her, and the shall confess.

Pound the same berries and strain them, and give them to any beast or man, that is overseen by a VVitch or VVitchcraft, and it helpeth them.

Take a cluster of the same berries, and hang them about a Horse neck, and it will cure them or him of the

Farcy or Fashons.

Take three ripe berries of the said tree, and pound them, and give them in white VVine, and it doth absolutely cure the yellow Jundice.

The first Medicine of the Salt of Quickbane Tree, Or wild Ash.

Take of his Salt half an ounce, and put to it three ounces of the spirit of wine, and dissolve it therein, then nip it up in a glass, and set it on the fire until it comes to his body of Salt again, then he is well.

The Vertues of it.

Being taken in white VVine, it doth take away the spitits or vapours, it provoketh sweat, but not much; it loosens the belly, but not much; it stayeth absolutely the Running of the Reins and VVhites in VVomen; it purgeth the Liver, and is a great opener of the pipes; and most excellent for the cough of the Lungs, and hath divers other vertues. The Dose is \ni j.

If it be mingled with the liquor, or water of Honey, It dissolveth Gold, Silver and Coper, and makes them Medicinable, and excellent Physick; for by them he sentiched in virtue. The which three Medicines shall be be laid down.

C Take

T Ake one pound of Honey, and add one pound of Oyl Olive unto it, and beat them well together, then put it into a Still Body, and distil in the greatest Balneo, then part the Oyl from it and keep that water.

Then take of that water one ounce, and of the Salt of Quickbane half an ounce, then take one dram of Gold and make it into small parts, and in forty eight hours it will

diffolve.

Then take that dissolution and put it into a Stil' Body sit for the purpose, then distil it. This water you must keep very preciously. The Dose is one Drachm in one spoonful of white VVine.

Follow the same processe with Silver and Coper, as you have done with Gold. The Dose of them is two drops of

either of them, which is a double proportion.

And now bere followeth the Vertues of the first Medicine, which is the Medicine of Gold.

This Medicine of Gold is very excellent to be given to any man in a Consumption, for if it be possible that he can be recovered, this will recover him in such short time, that he shall find present ease. It taketh away the Redness of the Face in six or eight times taking, it purgeth the Liver exceedingly; for it will make bitter qualmes of water to come over the Stomach; it is a great strengthener of Nature, and preserver of the Kidneys.

The Vertues of the second Medicine, viz. Of Silver.

Take two drops of it in white VVine, it is a present remedy

0

ne

T

ne

1-

er

52

id-

di

remedy for the Strangury, and taketh away the scalding of the Urine; it healeth any wound, but especially being hurt in the body; and so doth the Medicine of Coper, especially for an inward wound, and it is most excellent for the Rheum.

But this Medicine composed of all the three in one is

incomparable, which is this,

The one Dose of Gold, one of Silver, and one of Coper, and put them all together into three spoonfuls of white Wine, and it doth cure all the Diseases aforesaid more effectually than one by one.

Of the Prickwood, or Dog Tree, otherwise called the Squirrel Physick.

For, when the Squirrel is fick or bruised, he repaireth presently unto this Tree, and he will bark it, or eat of the berry, the which will purge him, and so he recovers his health.

Take of the Berries thereof dried, and wear them about you, and for two hours at that present they will provoke you to sleep, but it preserveth one from the Falling sickness, that whosoever hath this about them shall not fall.

Take two ounces of the Berries and boyl them in white VVine one part and filter it, and give one spoonful thereof, it cureth the Stitch and Spleen immediately, it cureth also the growing of the Melt, it cureth the Dropsie, it purgeth and breaketh VVind, it stayes the VVhites in VVomen, it is good against the Stone, it purisheth the Back and the Kidneys, also it cureth the Pox assuredly.

For

charge and calculations of the falling of

For the Dropfie.

Take the Rinds of Prickmood Tree one pound, and powder it, then boyl it in four quarts of white Wine, Cinnamon four ounces, Senna two ounces, Rheubarb half an ounce, boyl this again in a close Decoction, then distit it in the strongest Balneo.

Then put to this distilled water of Liquorice powder one ounce, powder of Anniseeds one ounce, drawn Cassia one ounce, Helleborus Albus one scruple, boyl this again in a

close Decoction, then distil it again.

The Dose to a weak body is half an ounce, and to one that is strong one ounce. This cureth all the Diseases before numerioned.

Of the Service Tree.

The fruit of it dryed and worn about the neck stoppeth bleeding, it causeth a woman to keep her child, and eaten green it is a very wholsom fruit for women with child, it will make them go out their time, except it be by some great accident, but the party using this same must refrain from VVine and much strong drink.

The water of this Tree is excellent good for the Strangury, and all inward bruises, it is a great scourer of the Ridneys, it is a great enemy to the Stone, it opens the conduits of the body in all parts, it cureth the yellow Jaundice, it helpeth fore breasts, it is most excellent for a Fishula and Canker.

cellent for a Fishula and Canker, the street and it was a second in the Street in the Portion of Current the Porti

The

The Medicine of it is this.

Ake one pound of the fruit pounded, and put to it one quart of Sack, and distilit in Balneo, and put to it Galangal, Fennel seeds, Liquirice and one ounce, Cinnamin two ounces, boyl this in a close Decoction, and distil in Balneo.

The Dose is one spoonful. This worketh all the effects aforesaid, and is an exceeding wholsom remedy for

wind, especially in the small Guts.

Take the juice of Services, and annoint the Piles and Hemorrhoids therewith, and it cureth them in twenty four hours.

Of the Peach Tree.

Take the Peach when it is half ripe, and dry it in the Sun, then steep it in Vinegar three days, then make it hot on a chasing dish of coals in a Sawcer, and as hot as the party can suffer it, bind it to the Navel of a woman, it will cause her to have her Terms, and also to conceive. The distilled water of the Peaches, or of the leaves, is very excellent against the Fevers, hot Agues, and Pleurisses. The Dose is one spoonful or two.

It purgeth the Liver and Blood, it stoppeth the flowing of the Seed if it be gathered in the blossoms. It be-

ing distilled cureth the shaking of the joints.

The Medicine of the Peach.

Take of the young shoots of the Peach Tree when they are soft, and also of the leaves, and distil them. Then B3 take

mon one pound, then distill again. The Dose is one spoon-ful.

This doth all the effect before mentioned, and inkilleth worms also; it is a great opener of the Stomach, and a great purger of the Liver; it is excellent against the Strangury, and the scalding of the Urine; and good for divers other things which in your practice will be seen.

Of the Slow Tree.

Take green Slows and steep them whole in the Oyl of Spike 24. hours, then take them out and dry them in an Oven, then steep them in that oyl again, and so let them remain in it, and keep it in a Gally por. Usus. Take three of those Slows, and bind them to the Navel, and let them lie 24. hours, and it will assuredly stop the bloody Flux.

Boyl green Slows with the Oyl of VVormwood, the Navel being annointed, and the Stomach therewith, it killeth all the worms in man, woman and child.

The Medicine.

Take of the water of distilled Slows one poole, addone pound of French Barley, and let it steep two days, then strain it; put to this Liquor half a pound of blanched Almons, a quarter of a pound of Liquorice; Boyl this in a close Decoction, then distil it in Balneo. The Dose is two spoonfuls.

This doth stop all Fluxes, and is a great restorer of Nature, it is also a great opener of the Conduits, and Uritories.

Rook

ı,

d

e

Avery strong Vinegar.

His Vinegar will work upon the metals very frong-

ly, it is otherwise called Acetum Radices.

Take green Slows before the shells of the stones be hard, and pound them and strain them, then distill that Liquor in the strongest Balneo, and put to it the like quantity of Slows as before, being bruised, then put it into a close veffel, and boyl it in a close Decoction, then distil it again in the strongest Balneo; and of it receive three waters, the sirst is the strongest, and keep it in a stone vessel. This is a most excellent Vinegar, and will work upon metals very strongly, the Feces of it will make an excellent Salt, which is very binding for Fluxes.

Of the Mandrake Apple.

The Mandrake green Apple being worn about the neck of the party that hath a VVen, even as the Apple doth wither, so shall the VVen.

The Mandrake Apple is the coldest Apple or fruit that is, and provoketh sleep, so that the juyce thereof drunk in white wine, the party shall hardly be awaked.

The Medicine of the Mandrake Apples.

The fix or seven Mandrake Apples, and put to theme one pint of Vinegar, boylthem in a close Decoction, then pour away the Vinegar, and crush or pound the Apples to a pulp, then put to it one pint of strong Aqua Vita, after that distill it in Balneo. The Dose is one dtachm.

This

This is an excellent Medicine, and Cordial for the Stomach, and exceeding good against wind; at is a great purger of the Liver; it takes he away the lightness of the heads in fick persons, and provoketh anoth kind and moderate sleep; it causeth women to have their Teams; it is also good for divers other things.

it in the strongest Balnes. The Dose is one spoonful.

This is a most excellent Cordial, and of great vertue; it is hurtful in no Diseases, but good against many, espe-

cially against poyson.

Then take the Feces of this Medicine, and put to it of Hysop water, Rose water, and Horehound water, of each one pint, boyl it well in a close Decoction, then distil it in the strongest Balneo. The Dose is two spoonfuls.

Amongst all the other vertues it hath this, that it is most excellent for women with Child, and maketh them

have a speedy delivery.

Then take the Feces and make a salt of them, and put that salt into this last and second water, and let it dissolve in it. Then take Senna sive ounces and burn it to ashes, and put it to the said water, three ounces of Polipodium sliced and shred, three drams of Rheubarb, as much of Diagred um, of Epithemum beaten one ounce, boyl this together in a close Decoction, then strain it, and add to the said liquor six ounces of Honey, the yelk of three Eggs, the powder of Dastills one ounce well searced, the powder of Turbith searced one ounce, boyl this together to a height, and make there-of Pills. The Dose is a Dram made up into sive Pills.

This is a most excellent purge, it cureth the Dropsie, the overflowing of the seed, it is excellent against the

Pox, and for divers other difeafes.

The Down of Carduus being laid on a green wound, doth heal it admirably, and the falt of it put into a wound, doth the same likewise, and keepeth it clean and sure.

Of Valerian.

Take the Roots of Valerian, and cut them in pretty

e

of

6-

5.

e,

he

nd,

eart

nick

ces

thick pieces like a dye, and dry them in an Oven, then lace them on a thred, and wear them about the Arms as a braceler, it will cure the Cramp, and it is exceeding good for the shaking Palfey, and being bound about the leg of a Woman, causeth her to have speedy delivery, and it causeth a woman to have her Courses. It is good for the Heart, it cureth a bleeding vein, if a man and his wife drink one to the other in the hour of Venus of the distilled water hereof, it causeth love between them. It is as Physical as Labdanum.

The first Medicine of Valerian called, The Fatal Liquor.

Take two pound of Valerian leaves and shred them, then put to it one quart of gentle spirit of wine once distilled, and then distill it in the strongest Balneo, then put this distilled water again upon the Feces, and thus distill it three times.

The Dose is one spoonful.

This is a most excellent water for inward bruises, or inward wounds, and it putteth all ill things from the heart, and driveth our Imposshumes. This is excellent for women after their delivery, and giveth great strength to them in their travel; it taketh away the fit of the falling sickness, and with the using of it in short time, it cureth the salling sicknesse, it cureth the Botches in the Lungs, otherwise called the Stone Pock, and it's very soveraign for many diseases.

The second Medicine called The Poor mans Liberty.

Take two pounds of Valerian, pound it, and then strain out the juyce, then add to the Juyce white wine one quart, Rose water one pint, of Liquorice six ounces, then boyl this in a close Decoction, then strain it, then put to the Fe-

ces another quart of white wine, and boyl it again in a close Decoction, then strain it, and put this water to the other, then add to them Cinnamon half a pound, then boyl it again in a close Decoction, after that distill it in the strongest Balneo. The Dose is a spoonful and a half, or two spoonfuls.

This is a most excellent water, and it hath many ex-

cellent qualities.

Of the Dragon.

Take the falt of Dragons one drachm, of Bezar Stone ten grains, Harts-horn three grains, mix all this together in powder, and eat it with Marmalet or Conserve, or with the pulp of an Apple, it expelleth all poison from the Heart, provoketh Sweat, and cureth the Pox; so that it is a very soveraign Medicine.

One drachm of his salt, boyled in Ewes milk, strengtheneth the back, it stoppeth the running of the

Reins, it cureth the Pox.

The Medicine of the Dragon Herb.

Ake the Salt of the Dragon two ounces, and grind it on a Marble stone, with a little spirit of Wine (to wit) one ounce, then put to it of Crocus Martis two drams, Bezar stone one scruple, and grind all together. The Dose is one scruple in the pulp of an Apple.

This being taken fasting is a great preservative against the Plague, and all such filthy diseases; It drives away all infection from the Heart, and it purgeth well the

Liver.

Another medicine of the same herb, called The VVell-Spring of Health.

Take of the distilled water of Dragons three quarts, and

put to it of Galangal half a pound, boil this in a close Decostion, then put to it of Pimpernel feeds, Annifeeds, and Senna, of each two ounces, Liquoris three ounces, Cinnamon four ounces, boil this again in a close Decoction, then distilit in the strongest Balneo, then put to the distilled water, Bawm six ounces, Angelica, and Carduus of e ich three ounces, of Scabious four ounces, then boil this, in a dose Decoction again, then put to it of Nutmegs one ounce, of Cloves two drams, Grains four drams, Corral half an ounce, Bezar half a dram, Pearls three drams, of the Albothoes horn one dram in a whole peece, Civet half a dram, Musk one scruple, Amber griece ten grains, Unicornes horn fifty grains, boil all this in a close Decoction again, then distill it in the strongest Balner, The Dose is one spoonful. This is one of the absolutest waters that ever was made, and that for all kinds of difeafes what foever.

Another Medicine of the Dragon.

Ake all the Feces of the first, and make salt thereof, I and put to it one quart of Dragon water, and put it into a Circulating glaf, and there let it circulate till it be all dried up; But do leave the Albothoe Horn with the rest, for it will serve again another time. The Dose is ten grains in one spoonful of white wine.

This is excellent against poyson, and all insectious

diseases. His name is Grebbins Comfort.

The third Medicine of the Dragon.

Ake this of the juyce of the Dragon, and vapour it to a I thick substance, then put to it six ounces of the juyce of Horehound and as much of the jurce of Hrfor, then take thi of Liquoris, bruise it, & put to it Horehound water one quart, and Hysop water one pint; boyl this in a close Decotion, shen

then strain it out, and vapour away three parts of it and better, then put it to the first thick juyce, and then take Cinnamon bruised half a pound, Amise ds bruised four ounces, put
to it three pints of Rose water, and boys it in a close Decoction, then strain it and vapour away three parts of it also,
then put it all together, put so much Sugar, and half so much
more as all the former substances do weigh, and so boys it to
a Syrup, which is a most excellent thing against all Colds,
Coughs, and a great opener of the Stomach, and very comfortable; it will suffer no infection about the Heart, it
breaketh Flegm exceedingly, and brings it away.

A General Medicine taken out of the First Part of this Book of Beasts, called The Flagrant Flower.

Ake of the stones of the Elephant two drams, or of his Pisell Dryed as much, of the hoof of the Unicorne two drachms, of the Unicornes Horn on drachm, of the Tongue or Stones of the Beever dried three Drams, of the Bones of a Dog Want half an ounce, of the blood of a Gray dried half an ounce, of the Heart of a Hare dryed, of the Skins of Martens dryed and beaten to pomder 36, of the shell of the Tortoise Egg three drachms, of the hair of the back of a Camell burnt 3 ss, of the tonque of an Asse, or of his boof three drackms, of the shinn and prickles of a Hedg-Hoog burnt to ashes half an ounce, of the stone of a Toads head two Grains, of the bones of the hinder part of a Frog ten Grains, of the Otter skinn burnt to ales ha'f an ounce, of the Velvet on a Stags head I alf an ounce, of the brains of a Stagg dried, and of the Horns of the Row-buck, of each half an ounce, of the Claws of a Lyon, or of a Bear on dram, of the Cive: half an ounce, of the Squirrels stones dryed three drachms, of zke

the bones of a water-Rat two drachms, the stones of a

Vire of the fat of a Dogg Fitche, fix drachms.

Take all the former portions and put them all together, being First made into small parts or powdred, and put to it of Vineger one Gallon, boyl this in a close Decoction very strongly, then distill in the strongest Balneo, then take the sees and make a salt thereof, the which put into the distilled water, then put that mater into a Circulating Glasse, and there Circulate it till it be dry. The Dose is four grains taken in any thing, as in Marmaler, Conserve, White wine, or in something else.

This is a most Excellent Medicine, and cureth all those diseases before mentioned for the most part, (that

is) in the first book.

The Second General Medicine of Trees, taken out of the Second Book, which is called The Wild Mans Will.

The of the salt of the Ceder two ounces, the salt of the Lignum Rhodium tree, or wood, three ounces, the rind of the Virr tree two ounces, the salt of the Pine tree Leaves two ounces, the juice of Pine Apples three ounces, the juice of Orenges two ounces, the salt of the Rinds of Orenges half an ounce, Nutmegs on ounce, the juice of Pomegranats one ounce, the salt of the rind of Pomgranats two drams, the juice of Lemons two ounces, the salt of the Lemon rinds half an ounce, of the wood of Sasafras two ounces, of the salt of Sasafras one ounce, the salt of the Tem-tree three drachms, the salt of the Ouickbane tree half an ounce, of the Distilled water of his berrys half a pint, the salt of the Prick-timber tree half an ounce, the

falt of the fruit of the Service-tree half an ounce, the salt of the Peach-tree half an ounce, of the juice of Slows two ounces.

Take all the former proportions of the salts and such like as is laid down of trees, and put them all together, and put to it six Quarts of Sack and boil all together in a close Decoction exceeding well, then distill it in the strongest Balneo, then put to the feces of Vinegar three quarts, and let it insuse two days, then silten it and vapor away that Vinegar to a salt. This distilled water is exceeding good for all diseases, and hurtfull to none; but its salt must be given with it, to every spoonfull three grains of the salt; The Dose is one spoonfull so used.

His vertues, It cureth Lues Venerea, the Dropfe, Pleurise, Gout, and all such moist diseases what-

foever.

The Third Medicine General taken out of the Third

Book of Herbs, and is called, Poste

without Haste.

Ake of the Distilled water of the French mallows one quart, and of his salt one ounce, of dryed Mousear the herb six ounces, and of his salt half an ounce, of the water of Angelica three pints, of his salt two ounces, of the wild Dragon called Cuckompintle, or Sterchmore, of his salt four ounces, of the water of St. Johns wort one pint, and of his salt half an ounce, of Valerian water one pint and a half, and of his salt one ounce and a half, of the Fatall liquor half a pint, of the Poor mans liberty six ounces, of Dragons water four quarts, and of its salt four ounces.

Take all these proportions and put them together and boyl them

le

00

t

d

d

1.

them in a close Decoction exceeding well, then distill away the one half of it, then put to the rest Rose water and Fenul water, of each one quart, then boyl it again in a close Decoction very well, and distil it again in the strongest Balno, then of the Peces make a fatt, and put all this falt to this last and second Water; But put none of the sale to the fost distilled water, but keep it by it self, for it is a very precious thing, and to be esteemed of great value. And the Dose of the first water is half a spoonfull, and the Dose of the second is one drachm and a half ar the most. And this is also a most Excellent water both in Phy-

fick and Chirurgery, and cureth all old wounds being

washed therewith.

A Generalissimo Medicine made of all the three former General Medicines put all together, and it is called, The Felicity of Nature.

Ake the first general Medicine of Beasts, and put it to the second general, and so disolve it in the liquer of the fecond.

Then take the third general Medicine, and put them all together, being very well mingled, put it into a glafe body, and distill it as long as any moisture will come, the

which water keep very close.

Then take the Feces and put them into a Copper we fell, and set it on the Coales, and let it stand one hour, there put it on a Marble stone and grind it well. so put it up into staffes and keep it very dry, and very well and close stopped.

The Dose of the water is one spoonfull at the most with one grain of Salt, and if you give but half a spoon-

full of the water, yet give one grain of Salt.

Part

2203\$333333

Part II.

First of the Diseases of the head and its remedies, and so gradually through all the Diseases of the Body.

First, black Rowls to purge the Head by the Nose.

ounces, Pellitory of Spain three ounces, of the juyce of Pellitory of the wall, and Germander, of each one ounce and a half, Primrofes the juyce two ounces, Flower-de-luce three ounces and a half, pound all these very small, and seeth it in a pint of Water, then press it and cast away the Feces, then take Sal Armoniack three grains, white Hellebore nine grains, Bay Bernies 5. Pepper Corns 9. Cloves 3. Cinnamon 15. grains, Turbith

purbith one dram and a half, Agarike 3j, Diagredii 3jjj.

make all these into sine powder and searce ir, with 3j.

sepithemum searced, then add. Honey the weight of
the A. Olibanum 17 d. Mastick 15 d. and boyl it to
thicknesse for Rowles, it will keep good seven

For Deafness, first purge the head with Rows made fit oput into the Nose, and then make this Medicine fol-

loving to put into the ears.

Restone Pitch 3j. Rossen, Turpentine and Wax, of such 3/s, Barrows grease 3j, Frankincense 3jj, Mirth 3j, nix these all together and stir it well, and let it come to pretry hard Salve, then make it into little Rowls to minto the ears, and sew a fold of a linnen cloath about in manner of Teat, with a thread well fastned to one and, to draw it back out of the ear, and you shall have it have corruption as out of a wound about the Tent, and moint the brims of the Ears every day with it,

Against the Head-Ach.

Re The Herb that groweth upon the Head of any mage, and it cureth the Head-ach by its Magical Vertue.

Against Wind in the Head.

Re Wheat Flower one pint, Sugar one pound, Rose later one pint, Bittony powdered, white Amber, Sker-mores, Anniseeds, Carraway seeds, Piony seeds, Cin-lamon, of each 3j, Elicampane 3ss, mix all these togeter to a paste, and if the water be too little add more, and make this into little cakes of an ounce a piece, and

take fine Sugar and lay under them in a paper, and so turn them, and do with Sugar as they do with flower, and then dry them in an Oven, and keep them as you do your dry sweet-meats, and eat one in the morning, and another at night, as you find your self oppress with wind,

Another against the wind in the Head.

Re. Potatoe roots one pound, pare them and boy them in white Wine, and Rose water, of equal parts till they be soft, then beat it in a Morrer to a Pulp, Wheaten flower and Sugar half a pound, Carraway seeds searced 31/s. Anniseeds searced, if it lack moisture put more Rose water to it, and make cakes of half an ounce or an ounce weight, and dry them in an Oven, and ear them at all times.

Against any pain, or dissinesse in the head, and to provoke sleep.

First purge, then sweat in a bath of hay and salt, aster that apply this Plaster on both sides the temples, and bind it fast.

Take Nutmegs 3j, White Poppy seeds, and Dill seeds of each 3j \(\beta \), beat all to a fine powder, and mix it with the oyl of Spike and make it to a paste, and make Cakes of it as big as a shilling, and at Night apply them to the temples. Praise God for this.

To Provoke fleep.

Take Laudanum two or three grains, make it into a pill, and give it at night going to bed in Marmalade

or the pap of an Apple, and drink burnt Sack alone with sugar after it, and then lie down to rest, it mitigates violent pains, it keeps down the sumes that mouble the brains in seavers, but give it not in the beginning of a seaver, less the patient sall frantick there-upon. Labdanum doth the same.

Another to cause sleep.

Take the pill Stirax and give it as the former to those that cannot sleep for Coughing, or are troubled with defluxion of Rheum, it provokes sleep, and easeth the pains of the stomach. The dose is ten or fifteen grains according to the strength of the patient.

Against a Rheum that troubles the teeth.

Take Salendines, either the root or stalk, and scrape off the rind, and put it into the ear on that side the pain is, and it will help.

An excellent Medicine to cleanse the teeth by around Rowl like a quilt.

Take Hysop, Organie, Mint, of each, 3jj, Harts horn, and common salt, of each 3jl, Calcine these together, and of Pumice stone, Cinnamon, Pepper of each 3j, Mirrh 3jj, Laudanum and Storax of each 3j Musk three grains, Calcine the first sive, and then grind all together on a marble stone, and make it into Rowls like quills to rub the teeth with disolved Gum Dragagant in Rose water, and so made into rowls, or quills, and it will be as hard as a stone, it will keep the

the Gums from putrefaction, and make the Teeth ver

A Nettle bruifed betwixt the fingers, and put in

bollow tooth cures it.

Against the shaking Palsey.

Take the bone of a Fox pizzell and dry it, then take Civet one dram and disolve it in Rose water, then steep the bone in it, and dry it again, then sew it in silk, and hang it about the neck, and it cureth the shaking Palsey in man or woman if under fifty years.

Against the falling sicknesse.

The bone of a Fox pizzell being worn by those that have this disease, it cureth them, or the disease shall never have power so long as it is worn by them.

To take off bair.

Take Passey water three ounces, the lesser Spurge, wild Catapusie in woods, of its juice half a pint, as much spirit of Sack, Tartar an ounce, whole Time Zij, Orpiment Zijj (or Realgar) and distill it and wash the place, and it will come no more.

The same medicine more enlarged.

Take Passey-water Zjjj, of the juyce of the lesiet. Spurge that growes in the woods, and spirit of Sack of each one pint, Tartar Zj, hot Lime Zjj, Orpiment Zjjj (ot Realgar)

ar)

Realgar) add to it of long pepper 3:j of the juyce of pellitory of Spain roots 3jj, of the juyce of Lemons 3j, boil this, then strain it (or which is better, presse it) and boil it to a thicknesse for a platter, first wash and bath the place with Aqua vitæ to take away all the filth and sweat, then lay on the platter at night, and in the morning wash the place, and it will be gone.

To dry up the humors of a red Nofe.

Take Sage one handfull, Wood-bine leaves, Rosemary, Lavender cotton, wild Time, Hysop, of each half a handfull, Tobacco, Senneycle, Vitriol, Rochallum of each 3j, Valerian 3jj, pur unto this of Plantane water, Ribwort-water, Hysop or bramble water of each half a pint, Cinnamon-water one pint, boil this in a dose Decoction, then distill it in the strongest Balneo, and so with this water wash it two or three times a day.

Against heat in the face.

Distill on pottle of new milk from the Cow, and put to it, Burrage leaves, Bugloss, and Liver-wort, of each Zijj, Violet leaves Zijj, Setwell and Colombine of each Zij, boil all in a close Decoction, then distill it again. The Dose is Zij, first and last.

Against the Rednesse of the face.

R Coral 3/s; Leaves of Gold 3;, Terra Sigillata 3/s, Saffron 3/s, Methridate 3;, of the strong spirit of Vinegar

It

negar 3jjj, nip all this into an oval glasse, and Calcine it; and when it is throughly Calcined, take it out of the glasse, and grind it one a Marble stone, and keep it for

your ule.

Then take Bezar 3/s, Galangal and pearl; of each 3j, Stibium Dj/s, Rheubarb Djj, white Sanders 3/s, nip this into an oval glasse, and set it into the strongest heat of your Stove till it be Calcined, and after it is Calcined take it out and grind it on the stone.

Then take the first part, and put unto it one pint of the spirit of Sack, and so let it insuse for your

use.

Then take of the Salt of Tobacco, and Pimpernel, of each 3j, of the Salt of Liverwort 3jjj, of the Salt of the Feces of my Cordial water 3jjjj, grind all these together on a Marble stone, and put to it a little spirit of Sack, and set it to disolve, and when it is throughly disolved, put it into the former, and put all into a Still body, or Retort, and distill it with a strong fire in Sand.

Then take the Feces and dry them well, and

that is your medicine, The dose is one scruple.

If you will have it tweat give it dry, if you will have it vomit, give it in two or three spoonfulls of its own water, and it vomiteth very gently, and maketh the body soluble, and it is an excellent thing, as shall be shewed hereafter.

Then take Musk. Civet, Ambergriece of each five or fix grains, and put to the water before distilled in a Retort, and put it in a bag, and there let it insuse in the water continually. The dose of the water is three, four, or five spoonfulls, it will cause vomit very gently.

It

It is a most excellent against poyson, and purgeth the Liver exceedingly; it taketh away all inflammations from it, it expels Spuma, and suffereth no imperfection about the Lungs, and it is excellent for divers things.

The powder worketh the same effects; it draweth away the Redness of the Face by sweat, it is an excellent

thing for the dead Palsie.

Awater called Albanito, against poyson, and all sumes of the Head, and all other pains of the Head.

Respirit of Wine one quart, a whole piece of the Albaho his Horn, 3/s, Seed Pearl, Mussel shels, the mean dried, Crabs Eyes, Angelica, Corral, Galangal, Fennel seeds, Carraway seeds, of each 3/s, make all into sine powder, and searce it, add to it Dragons, Scabious, Cinnamon, Anniseeds, of each 3/s, Dragon water 3/j, all must be made into small parts, and finely powdered, Civet 3/s, Amber griece ten grains, Unicorns Horn sive grains; put all these into a Still body and let it insuse ten days, then distil it in the strongest Balneo. The Dose is two spoorfuls.

A water for Sore eyes, and to kill all Tetters, Ring-worms Chaps in the Hands, and it healeth all old wounds.

Re Verdegrease half a pound, spirit of Wine one quart, put these together and distil it, then put to it white Coperas Zjjjj, Eye-bright Zvj, then boyl it open, and then distil it. This is a most admirable water for the Eyes, against all Films, Webs, Pearls, and hot Rheums in the Eyes, and for watery eyes and the like.

Avaing

Against a cold Rheum, or Morbus Gallicus.

First purge well for three days, then take this drink

as a Diet Drink, and continue it.

Re Rose water one Gallon, put to it of Sassafras wood, China, of each 3jj, Sanza, Senna, Gallangal, Balm, Polipodium, of each 3j, infuse it all together for three days, then boyl it in a close Decoction, then press it, and put to that pressed liquor, Liverwort, Anniseeds, Horehound, or of Horehound water, Hyssop, or Hyssop water, of each 3j, Liquoris 3jj, Elicampane, Fennel seeds, Carraway seeds, of each 3ss, boyl all these together again, in a close Decoction, then distil it in the strongest Balneo. The Dose is 3jj.

You shall find this to do exceeding much good to give breath, and to take away spitting, and to avoid Flegm in

abundance.

Another for a Rheum.

Re Ale one gallon, Annifeeds, Liquoris, Cinnamon, of each half a pound, boyl this in a close Decoction, and distill it in the strongest Balneo; then put to it of the Sassafras wood, China, Sanza, Polipodium, of each 3j, Senna 3jjj, Violet leaves, Burrage leaves, of each 3jj, boyl all these again in a close Decoction, and distil it again in the strongest Balneo. The Dose is one or two spoonfuls in the morning fasting, and presently after dinner, and so again presently after supper, then another spoonful just going to bed.

Now I descend from the Head to the parts of the Stomach, as the Liver, Lungs, Heart, Spleen, and the rest.

And first of the Lungs.

First, a Water against Poyson, and all Infectious Diff ales what soever that have affinity to the Heart, as the

Plague, and fuch like.

R A whole piece of the Albathos Horn 3B, spirit of lick one quart, boyl it in a close Decoction four hours, hen let it cool, and take out the Horn, for it is good for wher uses, and keep the spirir very close stopped, adde bit seed Pearls and Coral searced, of each 311, Gold, Crocus Martis, of each 3j, Oyle of Tartar, Oyle of A'monds; Spirit of Vinegar, of each 3j, put all these into glasse, and nip it very close, and put it into a stove or Ich like strong heat for twelve daies; then after it is welcooled, put it into the spirit of Sack, also adde Bezar stone 3 \beta, and Terra Sigillara 3 \beta, Galangal ß, Rew sceared 3j, Unicorns horn ten graines, Rose water one pint, boyl all in a close Decoction, then will it in the strongest Bilneo. The Dose is one spoonful. This cureth the poylon of Intoxicum at tempus, if 10

th

At

death, but the sooner the better; but if the poyson tarry long, this water will make the patient sick, but give him more every two hours, and continue it, and at last the patient shall break out in great blisters where it hath taken root, and so all the body over full of sore and scabs like a leper, and it will drive it from the heart and the party shall recover.

And for other ordinary poylon it is a present remedy and driveth all infections of any disease from the

Heart.

Another water against poyson.

Take of the Salt of Pimpernel, or of the 2 of it 3jjj Balfamum one pound and a half. Mithridate 18 ß Saffron 3; ß, Opium 3j, Spirit of Wine one quart, Be zar 3ß, digast it twenty daies in Balneo, then distill it in the silings of Iron or cinders, and ye shall have three waters.

The dose of the first is five or seven drops in Sack against poylon, The second is three drops in milk, it cureth the Gout, The Dose of the third is nine drops in Mouse-ear water, it cureth all Pestilent seavers. The first water is white, the second yellow, and the third

is a red water.

The former being too hot, ye may lessen the proportion thus, and call it Balzinatum.

R Balfimum 3jijj well washed, Mithridate 3is Galangal 3 β, Sasfron, and Pimpernel seed, of each 3is Bezar stone, and the Salt of Pimpernel, of each 3ji Anniseeds 01

Anniseeds, Carduus seeds, and Liquoris, of each 3j, Ter a significant 3jjj, Albothos horn, Unicorns horn, of each 3j, spirit of Wine, Rose water, Scabious water, and Angelica water, of each one pint; boil it in a close Descrition very gently in water in the body that ye do distil it in, but ye must have a very close cover with a double verge, and then very close luted, you must make a Still body with a close cover of tin for this purpose, then boil it as before in it very gently, and let it cool well before you open it, then pur on the head of your Still, and distill it in the strongest Balneo three times from its Feces, after it is distilled put in the Salt of Pimpernel, Elbony, and Carduus, of each 3jj, The Dose is one or two spoonfuls.

This is an excellent Cordial, and provoketh sweat, It cureth Lues Venerea, it breaketh Impollumes from within the body, out into the flesh. Its good for the head. It cureth all agues by sweat, taking of it a little before the fit going to bed, and sweat well thereupon, it never faileth, it hath cured very many, it is generally

good medicine, Praise God for it.

A second water to be distilled from the Feces of the former, and it is called

Balburmanda.

Put to the former Feces of Hore-hound water, Hylop water, Scabious, water of each one pine, Nutmegs,
Carduus feed, and Cinnamon of each 3j, Galangal,
Liquoris, and Anniseeds of each 3 ß, Bezar 3jj,
Castoreum 3 ß, Terra Sigillata 3jj, boil all these with
those Feces in a close Decoction, then dia li it in the
strongest Balneo.

E 4

This

This is an excellent water, and a great opener of the stomach (and as by experience) you may cure all forts of feavers and agues with it, by taking two spoonfulls when the fit comes, and then goe to bed and sweat well, the more the better. The Dose is two spoonfulls. Praise God for it.

Another water against Poyson.

R White Amber zvj, or zjjjj of the white, and zjj of the yellow will ferve as well, spirit of Wine, spirit of Vinegar, Fumitory water, of each on quart, Coral and Carraway seeds, of each 3jj, Dates, Galangal, Anniseeds, of each 3j, Liquoris 3jj, Almonds half a pound, Cinamon ξjjjj, Musk and Civer, of each 3 β, Amber-gris Dvj, Rose water one quart, and forbear all hot Wines, because of the rednesse of the face.

An Excellent remedy for that Poyfon called. Intoxicum ad Tempus.

R Water of Rew, white wine, Dragon water, of each one pint, put to this Mithridate 3ji, Scabius, Harts-horn filed, Cinamon, Galangal, of each 31, boil this in a close Decoction, then distil it in the Arongest Balneo.

Then put unto that distilled water Sassafras wood, China, Crabs eyes, Pimpernel seed, Spicnel roots, Elecampane, of each 3jjj, boil this again in a close Decoction, then distil it in the strongest Balneo.

Then put to that water Crocus Martis, Laudanum, Albathos horn, of each 3 ji, Coral, and Pearl, of each 3 ß, Bezar stone 3 \B, Vnicorns Dj, Civet and Musk, of each

カリ

The Dose is grains three in one spoonfull of the spirit of Sack. This former medicine and water is good for all-most all diseases, as the Palsey, the Pox, &c.

This Medicine following expelleth all Poyson from the Heart, provoketh sweat, cureth all Agues, and Morbus, it stayeth the Flux in women, causeth conception, loosseneth the Matrix, and taketh away the hardnesse thereof, it hath also many other Excellent vertues.

Re Peach leaves and China, of each zi, Cinamon zβ, Lignum Aloes zij; the Albathos horn one dram, Terra Sigillata ziji, you must Calcine all this severally, and then take the Calcined substance for your Medicine, then put to it Bezarstone in sine powder zi, beat all together in a morter, the which keep for your use, then take Pimpernel seeds zij, Saffron, Tormentil roots, and white Amber, of each zi, Pearls Calcined zβ, Coral Calcined ziß, beat all these together, and put thereto one pint of the strongest spirit of Sack, and let it insuse three days, then put to it of the dry Balsamum zi, then boyl this in a close Decoction, and distil it in the strongest Balneo; and you shall have an excellent water from the Feces, which water and Feces keep for your use; and praise God for it.

The Dose of this water is one spoonful.

Then take the Feces being throughly dried, and grind them together with 3 more of Terra Sigillata. The

Dose is half a dram in the strongest spirit of Sack.

It is an admirable sweat, it expelleth all poyson from the Heart, it expelleth out of the body all scabs, boyls and botches. It is an absolute medicine for the Pox and Leprosie, and provoketh sweat more abundantly than the water. It hath also many other vertues; for which praise God.

The way to make Pills of it, which is the chiefest Medicine.

Re All the former Feces, and add to it of Rheubarb, Diagredii, Bdellium, of each 3j, Caltorium 3jj, Cassia extract, Manna, and Polipodium in powder, of each 3ß, Catapusei seed, Cinnamon, and Anniseeds, of each 3jj, Honey six spoonfuls, Rose water half a pint; boyl this in a silver Still to a height for Pils. The Dose is 3jj \u03b3.

This is an admirable purge, and a most excellent

thing, to which God give his bleffing, Amen.

An excellent preparation of Terra Sigillata, that you buy, at the Apothecaries; for there is none so good as this.

Re Terra Sigillata made into fine powder ziji, and put to it one pint of the strongest Aqua Vita that you can get, and let it infuse three or four days, then set it on a chasing-dish of coals, and set it on site, and so let it burn, and when it is burnt as much as it will, put to it more Aqua Vita, and insuse it, and burn it as before, do this three times, till it be all burnt away to the slegm that will

a

will be left; then nip it into an Oval glass, and set it to a heat to dry up, and it wil come to be very hard, and in a manner as it were cruded like bay salt, so that there is none so good as this.

The Dose in 3 B in the spirit of Sack; this is the most

you can give; it provoketh sweat very much.

A Medicine to keep the body of man or woman in bealth, taking this three or four times a week.

Re Milk Thistle water, Honey-Suckle water, Rose water, Ysop water, white VVine, of each three spoonfuls; then add unto these waters Nutmegs 3, \$\beta\$, two cloves in powder, Honey half a quarter of a spoonful, Sugar the quantity of two hazle Nuts, Mithridate 3\$\beta\$, Sassion 3\$\beta\$, Civet two grains, Amber griece two grains, Bezar stone three grains, Terra Sigillata six grains of the purest, boyl all this in a silver or earthen dish till it be thick for Pills. The Dose is 3j in three or four Pills.

And let the patient take these when he or she goeth to bed, and this will give a delicate sweat, and if they follow it, they will find great ease hereby, as to many

distempers in the body.

To keep one in Health.

Re Saffron 3 B, Lapis Calaminaris 3j, beat it small, and wear it about thy neck in a bag.

Medicines against the Plague, Fevers, Agues, and the like.

An excelient Medicine, and present remedy and cure for the Plague.

Re Green Bears-foot, Garlick, Ground Ivy, Bay Salt, of each 3j, pound thus all together, and mix it well, and bind it to that place where you would have an Issue, but first make a little scratch with a Lancet, then bind this to the place, and change it once a day, casting the first into the fire, putting more afresh to the place, it gathers the corruption of the body to that place.

Then give the patient this Drink following.

Re Sack one pint, Rosemary branches four, Rue one, Nutmegs two, Cloves four, Bezar stone three grains, Unicorns Horn two grains, a stick of Cinnamon, boyl all these together in a skiller, then strain it and give a good draught in the morning warm fasting, and this is the absolute cure of the Plague,

Another against the Plague.

Re Of the Arrow-head stone, Terra Sigillata, and Be-

zar stone, of each 3 \beta, grind them together.

The Dose is 3 \(\beta \) in three spoonfuls of spirit of Sack, and let the patient sweat in his bed exceedingly, for this will provoke him to sweat, and drive it out of the body, and so cure him.

Medicines appropriated against Fevers and Agues.

Of a new Disease called Actisatin Fevers.

If the pain holdeth fast in the side, and the patient grows hot, and his water high coloured, open a vein a little 3

little, & let him blood on that fide the pain is at the first, and as it first comes with a shivering, then put the party in a sweat so soon as you may, before you purge or do any thing else.

purge with my Syrup two or three days together.

The purging Syrup.

Re Rose water, Ysop water. Danewort water, of each three quarts, and put to it of Dactiles, Polipodium, of each zij, Epithamum, Coloquintida and Senna, of each zijij, Cassia drawn, Galangal, Rheubarb, and Raisons stoned, of each zij, Turbith ziji, Agarick zij, Bdellium zi, Diagredium z \(\beta \), Carduus zij, Cassi seeds 100, Angelica roots zij, or of the leaves, three Figs, ten Carraway seeds, Fennel seeds, Ginger and Grains, of each zij, Orarge rinds and Castoreum, of each z \(\beta \). Take all these being well pounded, and put them into the water, boyl it in a close Decoction, then press it hard, and put that pressed Liquor into a Still body, and put to it the Juyce of these Herbs following.

Of the juyce of Milk-Thistle, Groundsel, Mallows, of each 3jj, of the juyce of Bettony 3jjj, the juyce of Elder, and the herb Mercury, of each 3ß, the juyce of Violets 3jjj, and put to it one pint of Ysop water; then distill all together in the gentlest Balneo, and the Feces is your purge (which is an extract.) Add Sugar to it, that is, to your water, and boyl it to a Syrup. The Dose is from one dram to 3j. The dose is from 3ß, to 3j of the Eztract, or 3j in Spearmint, Ysop, or Rose-

mary water.

Then make this mater.

Re French Barley the, soak it in distilled Milk. until it be ready to break, then put it into a common Still and distil it, and put to that water Dandelion, Milk Thistle, Groundsel, Mallows, the Herb Mercury, of each 31, Vormwood, Mummy, of each 33, Manna 3111, boyl this together in a close Decoction, and distil it in the strongest Balneo. The Dose is three or sour spoonfuls.

This disease is soon holpen if it be taken before it

comes to its height.

Then make this Broth for bim.

Re A piece of Veal, and put to it common water as you do for any broth, and put to it of Sassafras wood, Orange rinds, and Cinnamon, of each 3\beta, Pimpernel feed 3\iii. Castoreum 3\iii. Euphorbium 3\beta, boyl these all together with the Veal, and pour the broth from the drugs and meat (and let him drink it) and cast away the meat, you may cut a manchet or two and boyl with it.

Then to take away the pain of the sides, you shall take a hot loaf out of the Oven, cut it into two parts, Theriacle 31, oyl of Mace, the oyl of Amber which is distilled, or the oyl of Dill 33, oyl of Camomel 33, mix these well together, and then spread some of it upon the loaf as you do butter, and lay it hot to the side: and do this three or sour times, and it will remove the pain of the side; and it will do the like in Pleurisies.

Against a burning Fever.

Distil V Valnuts one week or two before Midsummer, and

and give of that water. The dose is 3j \u03b3.

Against an extreme heat.

Refrench Barly the sput to it of Burrage water, Milk Thistle water, Mallows water, of each one pint, water of Groundsel one pottle: Let the Barly insuse herein till it breaks, then pressit, and put to that siquor of the Herb Mercury, Endive, Setwel, Violet leaves, Strawberry leaves, Cinqsoyle, of each 3jj, Polipodium 3jjj, Serma 3j, boyl this in a close Decoction, and distill it in a common Still; then put to this water one pottle of distilled Milk, and drink this ordinarily a good quantity at a time, and this will qualifie the heat of the blood.

Of Cordial waters and their Marvellous effects, and first of Aqua de Novo, or the Calestial Cordial water.

Distil one quart of Spirit from three quarts, or one gallon of white V Vine, and put to it of Dragon water, ten 3, Parsley seeds, Cubebs, Peony seeds, Pimpernel seeds, Carremons, Cardamons, of each 3j, Cinnamon, Figs, Dates stoned, green Oranges, of each 3jj, Annifeeds, Cloves, of each 3jj, Grains, Castoreum, of each 3jj, Silio seeds, Fennel seeds, of each Dj, dried Oranges 3j, Ginger, Nutmegs, Acorns, Calamus Aromaticus, of each 3js, Long Peper 3 \(\beta\), Carraway seeds 3jjjj, Lignum Aloes \(\beta\), infuse all these things in the Spirit of Dragon water three or four days, the longer the better (being first well pounded) boys it in a close Decoction, then distil it in the strongest Balineo once or twice, dry from the Feces.

Then take nine or ten ounces of the strongest spirit of Sack, and infuse in it these things sollowing, Muthridate

of each 3j, the seeds or burrs of Egrimony 3j \(\beta\), Oculus Christi 3j, Dates, Cinnamon, Sanza, of each 3jj, Eringuish 3jj, Nutmegs 3jjj, Cloves, China, of each 3j, boyl all these in a close Decoction; then press it, and distil the

liquor in the strongest Balneo.

And keep the Feces of your water, and evaporate it to an Extract; if it be not Still dry enough, then put to that water which you have distilled, Coral, Pearls, white Amber, of each \$\beta\$, Albathoes horn, Ginger, of each \$\beta\$jj, of the Bustant his horn \$\beta\$j, Unicorns horn \$\beta\$j, Civet, Musk, Amber-gris, of each \$\beta\$j, Grains, Castorium, Anniseeds, of each \$\beta\$jjj, Lignum Aloes \$\beta\$j, and add to it of the strongest spirit of Sack half a pint; put all all together, let unifuse six days.

Then put to it of the water of Orange rinds half a pint, then boyl all together in a close Decoction, and distil it in the strongest Balneo. The Dose is one spoonful.

The Vertues of the first water are these.

It doth expell poylon very strongly, it cureth the Plague, it is also a preservative against the Plague, who so taketh a little of it every morning shall never have it; it causeth women to keep their Children, and it delivereth them at their time; it is most excellent against a Consumption of the Kidneys, and for all other Consumptions; it purgeth the Liver, and in time taketh away the redness of the face; it is an excellent Comforter of the Heart; it expelleth the Cramp and Convulsions; it purgeth the Blood and maketh it thin, and giveth it heat and a lively action; its very excellent for all Palseys; it is an universal medicine, good for all Diseases, and buxful to none.

There

m

oy

There is a second water to be made of the Feces. Put to it of the strongest spirit of Sack, add of the water of Orange rinds, of each one pint, and put it into a stone Jugge, and set it into a hot Dung-hill, and let it stand twelve days to put resie, then take it out, and after good cooling boyl it in a close Decoction, and distill it in the

strongest Balneo.

Then put to that distilled water of Cinnamon 3jj, of the stesh of Dates 3j, Castorium, Anniseeds, Fennel seeds, Carraway seeds, Ginger, Grains, of each 3js, Nutmegs, Cloves, of each 3 s. Boyl these in a close Decoction, distil it from the Feces three times in the strongest Balneo, and you shall have a most admirable water against wind; which is an excellent Cordial, and a singular thing for divers diseases, as afore is said of the first water. The Dose is one spoonful. It is not much inferiour to the first water.

Then take the Feces of your first water, and it is an excellent purge if you add to it of Rose water, Hysop water, Angelica water, of each one pint, and Rheubarb, Diagredium, of each 3jj, Aloes Secatri 3jjjj, Bdellium, Cinnamon, of each 3jj, of the juice of Milk-Thistle 3js, juyce of Mallowes, juyce of Bittony, juyce of Mercury, of each 3jj. Boyl these in a close Decoction; then pressit, and vapour it to a height for Pills; putting to it for poonfuls of Honey, or three spoonfuls of Sugar. The Dose is 3jj. This is an excellent purge, and may be given in all diseases.

An excellent water of the Horn of the Buffant.

R: Of the Horn 3j, white Amber, Coral, Pearls, Albathos Horn, of each 3jj, Unicorns Horn 3β, Bezu Rone,

re

more, for it is not to be declared. But let God have the glory now and ever more.

Now in the second place I shall sall upon the wonans matters, that is, the diseases of the Matrix, and its particular defects, the Medicines which are appropriated thereunto follow.

First a general Medicine for all women in the world.

Re Of Nutmegs pounded two pound, put to them three pints of Burrage water, Carduus water one quart, spirit of Sack one pint; boyl this in a close Decoction, and let it stand fixteen days to putrefie; then distil it in the strongest Balneo; then put to this water of the juice of Pomegranates Ziji, and of the rinds Ziß, drawn CashaZi, Mithridate, Cinnamon, Kernels of Pruen stones, sweet Almonds blanched, Orange rinds, Oculus Christi, of each Zß, Cloves, Sanza, Pimpernel seeds, Tormentil soots, Marygold stowers, of each Zji, Red Sage Zjiß, sassara, China, Eringuish, of each Zjiß, Anniseeds, sennel seeds, Carraway seeds, of each Zjiß; boyl all these in a close Decoction, and distil it in the strongest Bilneo.

Then put to this water of Labdanum, Mithridate, of each 3j, Coral Pearl, white Amber, of each 3ß, Alba-hos horn 3ß, Civet fix grains, Musk three grains, Bezar hone seven grains, Amber-gris eight grains; Let this influence days, then distill this in the strongest Balneo.

he Dose is one spoonful.

This is an admirable water, it stops all kinds of fluxes harsoever, and dryeth up the cold moisture of the body,

G 3

and

fu

問

fro

Sa

get Ba

æ

and it ripeneth in them the parts of conception, and caufeth them to conceive, it is also an excellent Cordial; it expelleth poyson, &c. Praise God for it.

I think it will be necessary before I do proceed any further, to speak one word or two of the Causes; hindering

conception, and they are three.

First, a cold and moist body, communicating the same to the womb, wherein it becomes a moist slippery slegm, which makes the womb lose her retentive faculty, it being cold, moist, and slippery, she cannot retain the Sperm and Seed when it is injected in unto her. And this defect is chiefly common amongst women, which may well be remedied.

Secondly, the body too hot and dry, causes a hot humidity to descend with the purging moisture, which creates in the womb a salt slegm and choler, which calcines

the Sperm when it is injected in unto her.

The third is wind, which weakens the string of conception, and by its ill motions keeps back the natural hear, or nourishing hot moist vapour from the womb. And now we shall proceed to the cure of these obstructions first, and declare the Medicines which cause conceptions and retains it in the womb till the full time.

First to strengthen the string of Conception which hath a know at the end, by which the child is held by the Navel, and taketh nourishment, and to ripen that kernel, till which time none can conquive. This Medicine is an excellent thing for any woman; it maketh them to keep their shild and nourish it; it also breaketh wind, and keep peth the body in good temper.

Re Dandelion, Ribwort, Broom flowers, Dragons,

Nep Royal, Collombines, Milk Thistle, the herb Metcury, of each zvj, Rosemary, Eringuish, of each zjjj, Satirion zjv, Violet flowers, Clovegilly-flowers, Bonewort, Salomons Seal, Pimpernel seeds, of each zj, Galangal zjj, Alexander seeds zs, Cinnamon, Scabious, of each zj \beta, Cloves, Castorium, of each zj, Sastron Dj\beta, Pound all the aforesaid herbs well, then put to them water distilled from Milk one quart, Rosewater three pints; then boyl it in a close Decoction, and distil it in the strongest Balanco. The dose is one spoonful.

For Conception.

Re Of the little white Lady Nuts 3j, and calcine them, and put to them one pint of Sack, and let it infuse 24. hours, then filter it, and take fine wheaten flower, and white Sugar, of each a little quantity, with a little Caraway seeds, and a like fresh Butter, then knead this together with the water, and make thereof little cakes, and let the patient eat them often.

This is a macrer to Thadow your Nuts, and this will

furely make her conceive.

C,

d

Note: You must keep all pewders in glasses very vell

Another excellent Purge.

R Of Coloquintida seeds to \u03bb. Catapusie seeds 3jv, Cassa seeds 3jjj, of the seeds of the yellow Flag, or of the

eves that grows in the water 3 B.

Then pound all these grossy, and put to it one quart of white Wine, then boys it in a close Decoction, and distilt in the strongest Balneo; which water being distilled, as the same away, for it it dangerous, onely keep the eces.

Then take the Feces, and put to it Hysop water one part, or some such like, and boyl it in a close Decocion aim, then press it exceeding well, then vapour it to an attract. The dose is 3 j to the strongest, but ordinarily is enough rowled up in Sugar to hard Pills.

It purgeth all watery and dropfical humours, theums,

nd all goury humours, the Pox and Paulsie, &c.

An excellent Purge for Dropsie, Gouts, and all moist Humours and Diseases.

Re The falt of Cataputie four grains. Bezar stone three mins, mixed and taken in the pulp of an Apple, Marmate, or any such thing is sufficient.

Another purge excellent for the Dropsie.

Re Scammonium 3 B, Bdellium, Diagredium, China, loes Secatrina, oyl of Nutmegs, Turbith, of each 3 j, tapusie seeds, Anniseeds, Pimpernel seeds, of each 3 j,

m

1

put to these white Wine one quart, then boys it in a close Decoction, then press it and put to that pressed liquor white Sugar 3jj, Honey two spoonfuls, and the yolks of two Eggs.

Then boyl this open until it be a thick substance for

Pills. The dose is 318.

Then put to the pressed Feces one pint of white Wine more, Rosewater one pint, Cinamon 3j, boyl it in closs Decoction again, then filter it; this water is to be given with a little Sugar. The dose is two or three spoonfuls for to make the Pills work the better.

A fine Pill for a woman.

Re Aloes, Mastick and Mirrh, of each, and make it in to a Pill as big as a pease with any Syrup, and take it after dinner and after supper.

A Pill for cold Dropsies; observing that Diagredium is a special help to the Liver, it cureth the knobs of the Pox.

Re Diagredium, Mastick, of each 3j, Aloes, Dactiles of each 3ß, Agarick 3jjj, Turbith 3jj, Coloquintid Jjj, Nutmegs 3ß, Ginger, Fennel seed, Cinamon, Galangal, of each Jj, Saffron, Unicorn, Mithridate, Bezar, of each Jj, pound it and searce it very fine, and compound it into one mass with some of the purging Syrup and mix it well in a morter. The dose is 3ß or Jjj mad up in three Pills, or you way give four Pills, which according to the foresaid dose you must not exceed.

Another purging Pill.

Re Aloes, Sarcocolla, Dactiles, Sagapenum, Diagredium, Turbith, Cinamon, Agarick, Galangal finely searced, Cloves, Mace, Ginger, Nutmegs, Anniseed, Dragagant, of each 3j, Saffron, Dill seed, Mastick, of each 3ß, Senna 3jj, Fennel seed 3jß. The Dragagant must be dissolved in Rosewater. The dose is 3jß made up in Pills.

Another.

Replipodium, Dactiles, Senna, Euphorbium, Sticados, of each 3j, Bettony and Valerian in powder, of each 3j, Diagredium, Cordial flowers, Wall-flowers, Violet flowers, and Gum Dragagant dissolved in Rosewater, of each 3jj, Galangal, Pepper, Nutmegs, Cloves, Mastick and Mace, of each 3 ß, Sasson Dj, all finely searced, and made into one Mass with the spirit of Wine, and keep it in a Gally por of earth, or such a like glass, and give it in Pills; but let it be all finely searced and well mixed. The dose is 5j ß in the pulp of an Apple, or Marma-lade.

A Mithridate, or a Purge for the Wind in the Stome ech to be taken as a Pill with Sugar and the Syrup of Bathen ries. It is a very excellent Purge.

R Fine white Tattar, Galangal, Rheubarb, of each 3j, Moes in fine powder walhed in Mint water 3,6, Helle-one Albus Dig Diagredium 3 jj B. one race of Ginger, Mithridate 3 jj, Caltorium nine granes, Emphorbium DB, Civet

Civet Di, Sugar Ziß dissolved in Zi of ordinary Cinnamon water; then beat it all together in a morter exceedingly well, that it may be equally mixed. The dose is Zi in five Pills at first; then Zß twice a day first and last in three Pills. It may be taken in the syrup of Violets.

Another Purge.

Re Aloes 3j, Bdellium 3jjj. Diagredium 3jj, Honey 3jjj, Saffron 3jβ, Sugar 3jj; boyl this all together to a height for Pills. The dose is 3j. It will keep good two years.

Another Purge.

R Polipodium the weight of 18 d. of Galangal, Elicampane the weight of 15 d. Annifeeds one spoonful and a half, Coriander one spoonful, Dactiles 3j, Ginger 3jj, Diagredium 3jj, Liquoris 3j, Cinnamon 3jjj: infuse all this in three pints of water and wine for 24. hours, and then boyl it in a close Decoction of Ashes, then press it forth, and put to that pressed siquor Senna 3jj \(\beta \), boyl it again in a close Decoction, and when it is very cold strain it. The dose is 3jjj or 3jjj \(\beta \), in the morning blood warm, but give it not at night. This givesh seven stools the first day, the second day sourteen It purgeth Flegm and Choler, gouty Humors, Head-

ach, and burning Fevers.

If you will distil it, then digest it nine days, then take of Senna, Dactiles, of each $3j\beta$, Polipodium the weight of 18 d. of water one quart, and of all the rest a double ortion, or proportion, and then distil it. The dose is $3j\beta$. The Feces are good for Clisters if you put one pint of

water to it, and boyl it and prefs it,

Another Purge.

Re Danewort the, and distil it, and you shall have 3v of water, put into that water half a Coloquintida Apple, and pound the seeds very small, of Catapusie one handful, the herb Mercury the, Diagredium, Agarick, Turbith, of each 31. distil this in the Dane water in the strongest Balneo to a dry Feces, The dose is 31 \beta.

It purgeth Flegm, and is good for short-winded persons, for the Reins, putrified Fevers, coldness of the Brains, the Pox, Dropsie, and such gross humours that

fall down in the inferiour parts of the body.

A Clifter.

Re Dragon water, Plantane water, of each one pint, the herb Mercury; Mallows, Violets, Fennel, Pellitory, of each a good handful, Annifeeds, Fennel feeds, Fennigrick, Linfeed, Cuminfeed, of each 3jj; boyl all these in the waters, then strain it, and take one pint blood warm for one Clister, into which put 3jjj of the spirit of Sack, oyl of Roses, oyl of Camomil, oyl of Wormwood, of each 3j, or three spoonfuls, and of Sallet oyl four spoonfuls, of the purging Syrup sour spoonfuls, Honey three spoonfuls, Salt 3j, the yolks of three Eggs, you may add 3jj of Castoreum for the wind.

To make an excellent oyl of Wormwood.

First make your oyl by distillation, then take 3jj of that oyl, and put to it of Bezar 3\beta, or Bezar stone 3j, Terra Sigillara 3j, Unicorns horn ren granes, Ambergris seven granes, boyl these together for half an hour, then strain it through a cloth, and put as much more oyl

to the Feces, and boyl it and strain it as before.

Then put it to the first oyl, and let it be nipped close in an oval glass, and put it into the Stove Furnace. The dose is four drops in three spoonfuls of spirit of Sack, and give this to any one that is poysoned, and it will drive it from the Heart and save his life, forcing it into the excremental parts of the body; it purifieth and purgeth the blood, and maketh the party very sound again; it also cureth the plague, provoketh sweat; and it is excellent to be given upon any excreme coldness; it hath also many excellent vertues.

I Asily we shall set down some special Plasters, Salves and Oyntments, with their use and Effect.

First a Plaster for the Sciatica.

R Black Soap, stone Pitch, Wax, of each thβ, juyce of Worm-wood ξjjj, Turpenvine ξjj, Aqua Vitæ ξvj,oyl Olive half a pint; boyl this to a Plaster, and spread it upon new Leather, and apply it to the place grieved.

If you add of Urine distilled 3jjj, or Ivy-berry water 3jjj, or the Gall of an Ox 3jjj, it will be the better.

10

A excellent oyl for the Sciatica, all Aches, Sinnews shrunk and swelling in the Legs.

Re Of Deers Suet, Dogs Grease, the fat of Rabbets, of each 3vj, Grayes grease 3x, the dropping of an Eele roatted, oyl of Amber, Capons grease, of each 3jj, oyl of Spike, oyl of Camomil, of each 3j, oyl of Popillion 3jj; put all these into a Retort, and with a strong fire distil it, if it doth not rise current put Aqua Vitæ to it, and then distil it. And with this oyl annoint the places grieved; it is an excellent oyl for the said uses.

Let the parient who hath any of these diseases aforesaid, sweat three times first, before you use the foresaid

remedies. They may sweat six hours together.

A Salve for a grievous Cut.

Re Clowns woundworr, Plantane, of each 3v, Trusty Roger and Wax, of each 3jjj, Valerian 3jjß, Sage 3jß, Hysop 3jj, Turpentine, Rosin, Barrows grease, of each 3j, oyl half a pint. Let the Herbs be well pounded, and then boyl all together till the Herbs are dry; then press it very hot; then take that salve, and put in your Turpentine and boyl it again, and add to it Mirrh, and Frankinsence, and then strain it; so you have an excellent good Salve.

tollings of the To beat a wound,

The Juice of Hylop is equal to Ballamum.

Choin collection and For old Sores in visit

The Cuddle bone made into powder, and mingled with red Wax, of each a like, helpeth old Sores.

A Salve for old Sores and Cankers.

Re Sallet oyl half a pint, Turpentine, the Juice of Sage and Hylop, stone Dirch, Wax, of each 3j, Rosin 3ß, Cerus 3jj, Camphire 3j, red Lead half a pound, boyl this in an earthen pipkin, and stir it till it be of an ash colour with a stick. If it boyl longer, it will be as hard as a stone. It is excellent for your use,

To cure Fiftulaes and all old Sores and Cankers most admirably.

Ik Oyl of Virriol 3j, put to it thijj of Saturn filed in five parts, and let it be all eaten with the Virriol, then put more Lead to it; for after it is first dissolved

edic will eat whatfoever you put to it; and when you we a good quantity of it, put it into a Retort, and put it one pint of white wine, and distil it twice from the less in Sand, and your Medicine is perfect. This is not excellent.

Of the Spirit of Allow.

R Allom this, Spirit of white Wine one pint, Planune water one pint distilled. It is excellent for old Sores, Oyl and Tobacco heal all Sores.

For any Aches.

Re Oyl Olive one pint, Turpentine half a pint, salt of Tobacco 3jij β, Salgem, Salarmoniack, of each 3jij β, sistilit, or else make an owntment for old Sores. You mught to purge in the cure of all old Sores.

A gentle Purge.

Re a few drops of Aqua Ardens, Aloes Secatrina, of the purging Syrup, of each 3j, Galangal, Mastick, Annifords, Fennel seeds, Cinnamon, of each 3j.

An excellent Secret of Sennato Purge.

Re Senna beaten to powder fbj, white Wine, Hysop water, Polipodium water, of each one pint, then steep two leaves of Tobacco in it 24. hours, and distilit in the strongest Balneo.

Then put into this distilled water of Rheubarb,

Diagredium, of each 3ji, two Dactiles, Mace 3 B, Clove there is then pound all these and put it into a bag, and led it insuse and lie in the distilled water. The Dose is 300, this will purge excellently, and the water will not alter its colour.

Parc III.

The Denarian Trad.

Aving confidered the so many parts of excellency in the Essences of Nature, according to its graduation in every Species, which is for the inifestation of its own secrets, locks up in its Center, we made bold without the consent of Ignorance, to tempt this kind of Learning, though so much a strantramongst us at this day.

This Denary or number Ten, is the highest number activities to the largest extent of Nature; for the number the being the Spirit or Quintessence, joined with its bothe number Four, or the four Elements made we, out of this number Nine, or by the Conjunction of the number and Eivesthe Sun of perfection is brought forth, which the number Ten. As a Child is procreated in the womb its Mother for nine months; so out of the number Nine.

Nine proceeded one, which is the Childs perfection, I say the child it self, which is the tenth Number, or the perfection of Nature. Those that are wise will be sober, and consider wisely of the works of Nature and Art. The sour Elements subsist by a Fifth Essence, which is their quickning Spirit, by which they perfect all things, according to the Kinds of Seeds, and matrixes which are within Natures bounds; so Art out of something (like Nature) by digestion only converts the sour Elements into a fifth Essence, which is the exaltation of Nature. This sist he Essence of Art joined with the fifth Essence of Nature makes the number Ten end in Perfection, that is, in Unity, or One, as at first.

Some will say this is a high obscure Speech; others will say it is non-lense. Let the seed fall on what ground it may, I shall lose nothing. But for the sakes of some I shall in the subsequent Discourse open the secret, with the Physical use there; of the Numbers Quaternary, and Quinary. Because I would have you Proceed to more high and weighty matters, in the Physicks of the Natural Principles, which if the Lord permit I shall shew, how with ten Medicaments all diseases may be cured; Before Hippocrates there was but one Medicine used; Therefore must you observe two things before we come to this our Denary; which many Learned Doctors have

practifed in feeking and refloring health.

The first concerns the Soul and Mind.

. The fecond the Body.

STATE

For as man is composed of Soul and Body, so there are found many Diseases which regard each of them; some arise from the weak and doubting mind, which not knowing its proper strength and faculty, yields to all sorts of Evil.

Hence all those Evils which proceed from the Desofthe South, under whom are contained incantam, Magical works, the Influences, and Curses of mons, and other Evils which do predominate over e-

w whereas that to every abstracted power, is sub-la corporal power, as Experience testifies, nothing eproduced nor acted, that doth not arise from an abad power; wherefore many rare Doctors that were e Hippocrates, did only make use of the faculty of pirit and Mind, without any Corporeal Medicas to cure all Diseases, meerly by the will and Imaon of the Patients. They did not only cure all Di-They did not only raise the Dead; But comman-Elements; So that the Water became folid or And Steel became Air; And thence did proceed Hail, and Clouds; And that with any order; The was made rare and thin by them, to that they energize into the Depth of Center thereof, as is ded of Orpheus; The Fire which is of its own Naannot but burn, was by them made colder than the rin the effecting of these things, there is a cerchicle or Conjunction, which consists of an abed and most simple thing, and of another which is ain Medium, conjoyning the abstract with the bo-So when there are two faculties conjoyned, whereone operates by the will alone, by the fight only, the Soul is fed and filled with the Divine influence, idates of the Spirit of God, as it is faid by Christ, wher Speaks and I Speak, My Father Works and (that is) the power of the Divine Nature, king and Working in him, or in his Human Nature,

by the power of which Union he could fay, So I William I Command, without adding any Corporeal his thereunto; Alio I befeech the Reader to understands precedent words of the Conversion of the Water, Earland Steel, to be nothing else but the Conversion of the Elements by a Philosophical and Chimical operation.

This is that Cabala, by which all those who he wrought miracles from the beginning of the World operate. Before the comming of Christ this faculty Sourish vary openly; But now there hardly remain memorial of those divine things; now it happens becar of the Blindnesse, Vnbelief, and Ignorance of me who full keep one the other as Prisoners in the State Folly and Unbelief, that they will not believe the wo of God, nor the promises of Christ and his Apostles, this cause we have a plain Text, which saith, What soe yee shall ask in my name without wavering or doubtin Shall be given unto you; And it is the more admirable missculous, Because if he who asks bath but so much Fa as is one Grane of Mustard Seed, bo shall do more greater miracles than Christ did; Hence it appears, the chiefest Instrument, not only to cure Diseases, allo to do many other rare things, by that first and chi est part of Man (vis.) the Soul, doth consist in Strong and not Cadent Imagination.

The other way by which the learned and wife men we wrought miracles did proceed, is from the propriety the thing. Indeed it is to be lamented, that in these ges the faculties and proprieties of things are not know and also their names and words are hidden. Now come to the point, I, with divers learned Philosophe do say, that God hath abundantly granted Remedies to Cure all sorts of Diseases, which doth Consist

Her

Springs, and in Minerals, fo that questionlesse, and to ountry are granted some certain things natural to ce, for to cure the Difeases of that Country. And which is a hot Country, there grows but very Wormwood, and in the Gardens; But a great ance of Poppey, Hemlock, and other cold Herbs: it appears, that cooling things are more needful in Country, than those that are hot. So likewise in and Germany, grow, Nettles and Wormwood ewhere in great abundance, which indicates that hot s are more requifite for those Countryes, than of a cold Nature; And therefore a certain Physiof Norinberg, to foon as he came into any Town, are any Body, he took notice all about that Town, ofe Simples that grew there most frequently, and in eft quantity, and them he distilled with hot things thus he did make a certain fifth effence, wherewith med all Diseases in Poland, &c.

conficin V Vords, Characters, and Heibs; It is in that the Characters and VVords though they may he but little, are fart more powerful, and better Corporeal things, fo that not only by ten medicabut even with three or four VVords, or Chao death, because none can live beyond the hour

t is recorded by a wife Arrift, that the three names sod which is of the Linea Sancti spiritus, is of wonderterrue to cure fuch Difeases which all men judge incurable. I shall make bold to present the names to Ingenuous, that they may in rhe sear of God after so zealous and unseigned request gain savour from the Lo to know the right use of them. The names are Oro, 16 Aozpi, being of three, sour, and sive Letters; out of the Line with its Table are drawn many Names of seve Powers and Vertues, as Sias, f, m, n, d, these sour of Physick, add a, to make the Quinary Number Finand then he will cure admirably by the name of Goldogo, the good Angels of health, named under a source of Characters are called, and by the name Arda they are commanded and constrained to do thy will curing the party named; without doubt the Operat most be a very God-like, righteous, and humble person otherwise he will not do any thing by the leave and savour of the most high.

Now let us speak of those ten Medicaments whereh any curable Disease is healed. Piens Miriandal saith, that he who knows how to expound the Quater nary Number by the Denary, doth penetrate into the depth of Sciences. Now while I say that all diseases made healed with these ten Medicaments, you must under stand it thus; That sirst one Medicament be used before the rest, and when I say one Medicament, I understand many. I shall now unfold this secret unto you, one of these Medicaments, the moving Opperator; thence you must gather, that no Medicament can be of any Vertue unless the Physicians imagination be whosly simple and strong, (viz.) that he doth know and acknowledge that the Almighty God can and will, through some effectual Medicament, help and raise the sick, that he may not despair

the

air of Gods Mercy, and his fector Divine in-

Figordal

at

0

el me ha a re no

en must he find it out by the Quarernary, for in one Is no operation, as Pythagoras faith, If one ought oceed into operation, it must be divided by a Quairy; and that I may discover unto you this fecter or ery, Note, one distemper called by divers names the variety of the parts, and of the concurring mat-

I say one disease is an affection beyond Nature, or according to Nature, immediately impediting the tion and operation of Nature. Which must be radod of the threefold Function, viz. Natural, Viand Animal; this can be but the difteniper of one. the diffemper of the Quaternary, I say of one Faculof the natural Heat, because it ought to have unit felf Organs not impedited, to wit, Spirits, and all t Cubministrated matter, wherewith it may perform nctions; hence conclude, that by reason of the dinper, you must take a punctual observation of the naheat, of the faculties and powers, which naturally fignifie one thing; and because that they being diys draw the beginning from them; that you may not ture upon any thing without due and good confiderati-

Therefore examine ye well that one, and bring it to ation, that you may always understand to expound it rding to the Quinary, that it tetains five in it felf, viz. Alterity, or Mutation under the Matter, and the Matwithout Change, and what afterward ariseth thence. Alterity with the Marter is when a Difease doth a either from a simple Intemperament, or from an Inimperament joined with the Matter. Therefore under Medicament you shall have four, which doth concern

the peccant Matter, and one that concerns the Altration.

As concerning those that do alter and change. Tho Simples are excellently cold for to alter the extremit of heat, viz. Endive, Cichory, Sandal, &c. And tho admirably hot to temper immoderate cold, viz. Worm wood, Mint, and Organy. And an immoderate moistur is cured by the roots of Oak, Plantane, and young Cocks Poppy, the juice of Pimpernel, Endives, and Beers. An the Firmament of Unity intended into the Quaternary also to be understood Rheubarb, Colocinthis, Agarick Hellebore, and Phlebotomy. And to purge Choles Rheubarb and Manna is excellent. And for the Pituit or Phlegm, Agarick and Coloquintida are excellent. His purge Melancholy in this manner. Take Rheubarb 31 with 3jj of Marma diffolved in Cicory or Endive water Trochifoes of Agarick beat into powder 3 j, with Honey of Roses dissolved 3jj, the Syrup De Tribus Radicibus and of Endive water 3jj, add to it for the Gripings, Ci. namon water 3j, of the rind of black Hellebore fifteen granes, Senna in powder 3 B prepared, of the Syrup of Burrage, or Hops 3j, 8cc.

Now that I may comprehend in this one Medicament what I intend, you must observe, that all the Causes of Diseases are either cold or hot. Now to cure a cold Disease, wherever the distemper be, you must take 3jjj of the Electuary of Hiere Logodium with the water of Endive or Hysop, and simple Honey of Roses 3 s, oyl of Vitriol six drops, or so much as will make it tart. And to cure a hot Disease, Take of Rheubarh 3j, Manna 3jj,

Endive water 3ij, spirit of Vitriol to make it tart.

The second Medicament is for the distempers of wo-

pen, and besides ordinary Medicaments, there is nothing better for all the diseases in women than this.

Re of Musa Ænea Djj or 3j, Syrup of Mugwort, or the leser or greater Triphera, with the syrup of Hysop, exept the disease doth proceed from an hidden cause.

The third Remedy is the Requies of Nicolas for to provoke sleep, for to receive strength. The Dose-of it is 3j or 3jj, with 3j of Syrup of Poppy, and Endive wa-

ter 31.

This Medicine hath such a faculty, that by it you may know what may become of the patient; for if he sleep quietly, having received this Medicament, and is better after it than he was before it, it is a good sign; but if he takes no rest, and thereupon grows worse, it is a bad sign.

The fourth Remedy are the Vesicatories, which are raised either with Spanish Flies, Ferment, or Leaven, which are used especially in Cordial Diseases, or diseases of the Heart, and that which concerns the inward faculties of the humane body, they with a Julip equivalent cure the sick in five days; but if the patient doth not suddenly amend after these Vesicatories, there is no hope of his recovery.

The fifth Medicament is the inunction of Salet Oyl, for to know the event of the disease; it must be thus

uled.

Take Oyl Olive, and with it rub gently the who'e body of the fick party, except the head, if after three times rubbing there appears a moderate swear, the disease is of some long continuance, but it is cutable; but if there arise no sweat, the disease is questionless mortal. But if the patient sweats he shall escape.

The fixth is a Decoction made thus.

Tak:

Take of Dog tree, of Dyers Berries, of round Mugwort, of each 3j, and of Sparagus Mjj, with a sufficient quantity of Sparagus water well sweetned with Sugar, whereof give 3jjji to the patient; if after it the patient is eased, it is a good sign; but if not, it is a bad sign, of what quality soever the disease is, whether hot or cold, and in this sweat is a very good sign.

The seventh is Clisters, but they must not be given but only in the distempers of the inferiour parts, as the belly, or in Fevers, and the Iliack Passion, the Stone, or to cool the Reins, the cure of which diseases, one of the ways of operating by Clisters is simple and compound,

Thus.

Take Mallow leaves, Anapugium, and of Brantied in a cloath M jj; make a Decoction in a sufficient quantity of fresh Broath, and take of this Decoction one pint, of coarse Sugar, Oyl of Camomil, and Oyl of Rhu, of each 3j, yolks of Eggs two, of common salt 3j, mix these

together, and give it blood warm.

Now observe in this case, that both hot and cold distempers are sound in the inferiour parts, as the belly; therefore for hot diseases add to the asoresaid siquor, oyl of Mandrake, of Poppies, of Nyphea, and of Jusquiammum. Mark, also sot to provoke sleep, and other assections of the Head, altering the Clisters, may be safely and very profitably given, if they be retained a good while, either in hot or cold diseases.

The other fort of ICisters is made with the same Decoction, adding to it for a cold disease, of the Electuary Hirere Logodium, or Benedicta 3j. And in a hot discases add to your said liquor Cassia newly drawn 3jj, with as much Syrup of Nenuphor, Linseed one spoonful

bruised.

The eighth is the provocation of Sneeling, especially for the distempers of the Head and Ventricles, as the Italian powder; and if by it I find no amendment, then I am out of hope.

The ninth is for sleep, When the patient is afflicted by a distemper in the intrinsical parts, as in the Ventricles

and Head, which is thus.

Take of Hiera Picra the compound, so much as will make a Suppository, and then give him 3j of Hiera in powder mixt with Syrup of Roles simple, in a proporti-

onated quantity of Cordial water.

The tenth is the use of Lignum Guaicum in cold difletapers, and how to know the Spanish Difeafe. Note, when the Hair sheds, when Ulcers do appear in the tenderest and thinnest places of the body, as the Mouth, Neck, Arms from the Elbows downwards, the Flanck, Buttocks; Secrets, Legs, knobs on the Secrets, The Reins purge themselves by the Grines, in which will rise Tumors with great anguish, which must be broken, and the Impost bag drawn out. Also when crusty scabs and spots do break out in and about the Head and Face, as the Forehead, Temples, Nose, Lips; when the extreme members are grieved with anguish, as the Head, Arms, Fingers, Legs, Feet. The shedding of the Hair in this disease differs from the shedding of the Hair in the Alopecia, beouse that in the Aloperia the hair do shed by great broad places; but it doth not so in this disease. The crusty spots that doth arise in the Head and Neck, by reason of the foresaid disease, are like Warts; also great pain about the bones, when nothing outwardly can be feen, and yet grieves not the Arteries. The cure of this difease is with Mercury well prepared with Gold, or with a medicine which shall be fet down at the end of this Denary. Now

Now the first Radix to operate in Physical secrets that belongs to the Body, is to consider how to decrease or increase the blood, then may you operate what you will, and you shall purge the Patient of Choler, Flegm, and

Melancholy.

The second Radix is the Imagination & the Confidence, and generally all the passions of the mind, which must be impretted into the mind of a man; For we must perswade the fick parties that they shall recover, though he himself may have no hope, for Galen faith in his Prognosticks, that a good confidence, and hope, are more efficacious than the Medicine it self, for he cures most, in whom men put most confidence; Hence Hypocrates saith, that in all Difeases the Mind must be comforted, &c. And if you deeply and feriously consider that great things may be effected by the Imagination and Reason of the Mind, you may freely fay that there is nothing more rare, nor true, nor hidden, nor more safe, for we read in the books of the Philosophers, concerning their experiences, that to the passions of the mind, are attributed the best and miraculous things; For what Medicine is more hot than Anger, and more diffolving Love, and engendering discord and perplexity than this Anger? and what is more. cooling than Fear, and comforting than loy, and yieldirg better food than Hope, and killing fooner, and more destroying than Despair, for with these the Philosophers have done very rare things, all she fecrets of Phyfick do confift in these things, and in those above mertioned. I furt her add what Galenus faith in his Commentary upon Hypocrates his Book of humors, as being ar Author much approved by the College; That if any shall say, that the humors of the Body being changed, thereby are changed the actions of the Soul, fo that the ons ons

actions of the Soul being changed, changes also the hu

mors, he speaks truth..

And it is thus confirmed, because that when the Cholerique passion rules in man he is angry, and so contrary. wife, because that when Choler is increased, the complexion of the Soul, and the Animal faculty of the Body, must needs be moved; and knowledge is increased in the Mindby a Cholerique complexion, and contrarily is increased an inclination to study by Melancholy; and delight and walking by the Sanguine Complexion; the Phlegm helps not at all, the Reason of the Soul, but only in the change of things fixed; it then appears, that if the Physician helps the Complexion of the Mind, whether by Incantation or Adjuration, or by things worn as bout the Neck, that the complexion of the Body is also helped. Now if a meet remedy is added to these things, the health of the Patient is the fooner recovered, because the Body is helped with a Medicine, and the Mind with Incantation, &c. which being joyned together, the recovery of both must needs follow the sooner; And Ga. les faith, that there are some men who nuturally are joyful and pleafant, falling fick, are perswaled by the Physician that they shall soon be cured; and thus min 1ing them of their diet, with moderate exercise, their hope is the principal cause of their recovery; And there are fome or a contrary nature, who are alwayes fad, whence their spirits are afflicted and Braightned through cogitations, which Cogitations the Phylician must deceive by rejoycing their intentions, and changing their minds, but not beyond a moderate joy, lest that through the greatnest of promises, they should neglect their own

Things hanged about the neck, do help by a certain adhe-

rent property, and not by their own Nature, and it may be done for the comforting of the Mind, whereof I shall give you some few examples; Aristotle in his book of Stones, saith, that an Emrald hanged about the neck, or worn on the singer, helps one from the cause of the Epilepsie. There are noble Persons advised to hang an Emrald on their Childrens Necks to preserve them from the Convulsion Fits.

Again a Hyacinth worn on the Neck, or Finger, will preserve one from Insection, if he shall go into an infected place; also he that wears it, is honored in the minds of men, and obtains his Requests of his Betters. Wearing the weight of twenty Barly Corns of the said

Stone, you shall have no fearful dreams.

The Heart of a Kite worn about the Neck or Finger, mitigates Choler, Wrath, Contention, whose Center is like the water wherein is flesh washed, it stops the Flux of blood, in what Member soever it be, especially in women.

A Cythimus hung about the Neck, or worn on the Finger, increaseth fearful, horrid, and fad Dreams, and

breeds Quarrels and Contentions amongst men.

The Dung of a Wolf that hath eaten Bones, being applyed to the Belly, or Neck, immediately asswageth the Black passion; They are sometimes hung to the Leg. and tyed to it with a thred, of the wool of a Sheep eaten by the Wolf, but if you can have no such thing, then tye it with a string of a Harts Skin.

A Serpent of Tyria being hung on the Neck of one who is obnoxious to Suffocation, cures them of it, and is of

great efficacy in the Apostomes of the Throat.

The Root of Sparagus being applyed and kept upon the Tooth, draws it forth without pain.

The

the Liver of a Dog, except it be a bearing Birch, beworn about one, hinders the Dogs to bark at him wears it. best sond at

The right foot of a Tortoise being laid to the right of one that hath the Gout, and the left to the left, eps the paint the fame power hath it in the Hands.

First to find out what Planet ruleth every hour of th

day or night by the foregoing table.

You must know that the Astrologians have appropriated to each day of the week a several Planet, be ginning alwaies their Artificial day at Sun rising, and giving that Planet that ruleth the day to the first hour of the day. The Second Planet to the second hour of the day. The Third to the third hour, &c.

And Note, That you are to divide the day, that is, on Sun rising, to Sun set, into twelve equal parts, hereof six hours contains the hours before Noon, and other afternoon, so you ought to divide every day in the whole year into twelve equal parts, whose twelf at contains one hour Astrological, you must account the sy from Sun rising, until Sun rising again the next day, such shall make 24 hours.

The seven Planets Govern the seven days of the week

cording to the names of the days.

As O Sol Sunday, D Luna Monday, & Mars Tuesday, Mercury Wednesday, 4 Jupiter Thursday, & Venus Fri-

y, h Saturn Saturday.

th

Note, that every Planet on his own proper day governth the first and eighth hour of that day. The first hour eginning just at Sun rising, and his eighth hour begins at

me a clock in the afternoon; As for example.

On the thirteenth day of November, this present ear 1650 the Sun riseth at eight of the clock in the foretion, this thirteenth day being on Sunday, the Degins is reign for that day, and his first hour just at Sun rising, and continueshis reign forty minutes, which is the planeraty hour for that day. Next after O rules Q which is the econd planetary hour of that day, she begins her reign just at twenty minutes before nine of the clock, and ends at twenty minutes after nine, at which time & begins his leign, and ends just at ten a clock, at which time D begins the reign, and ends twenty minutes before a eleven, at which time D begins to rule, and ends his hour twenty minutes after eleven, at which time U begins his hour, and ends just at twelve, (which are the first six planetary hours of that day) O beginneth to rule just at twelve, and ends his hour twenty minutes before one. At which

which time \odot beginneth his second hour, which is the eighth hour of the day; Proceed according to this examp to find any hour of the night, if the question be at the time, or to doe some Magical operation. The minute of the Planetary hours of the night on the foresaid do of November are 80, which must be added to the time of \odot set, as I have done in the example of \odot rising; of so for every day and night in the year when you would fin the proper Planet governing that hour, which you would seek.

This example you shall find in the precedent table where you see November the sourceenth, \odot in 2, thre degrees over against which you have the Suns rising, set ing, hours of the day, hours of the night, how many minutes are contained in a planetary hour for that day, and how many minutes for the hours of the night, every par several in its own Column, as you may see by their titles also you must know that the planetary are always unequal, unlesse at which time the \odot is in γ , or \rightleftharpoons , at which time a planetary hour is just fixty minutes, equal to the hours of the clock.

Now

ow I shall add the Table of the Signs Continuance in the Ascendant, with its Use.

e Sign wherein the Sun is, for that Sign in which the un passeth, alwayes is the first sign that doth ascend eve-

ry day for a solar month which is 30 days. The \odot mot on is one degree in 24 hours, and one sign contains 3 degrees, so that in twelve months the \odot makes his revolution through the 12 signs, beginning his ingresse in to γ on the 11th. of March, at which time you have ascending with the \odot every morning, which is called the first hour of the day.

The roth day of April, the O leaves v, which sign fies the Head, and enters &, which signifies the Ne

and Throat.

The 11th. day of May he enters II, which signifies the Arms and Shoulders, and all pains in the joynts.

The 12th. of June he leaves II, and enters &; wh rules the Breast and Stomach, and all falt humidity ther

and Back, and pains their residing, as a Plurisie, Boo congealed, Sursits, the Pestilence, too much heat.

August the 13th, the O entersm, who rules the Bow els and Belly, barrenesse in the Womb, or some of struction there, the Griping of the Guts, or Ulcer there.

September the 13th the o enters , who rules the Reins and Kidneys, Pains, Wind, and Gravel there Gonorrhea.

October the 14th, the o enters m, who governs the secrets of both Man and Woman, and fignifies Vicer and Sores in those parts, the French Pox, the Whites.

November the 12th the O'enters 2, who rules the Thighes and Buttocks, and Sores, Fistulaes, Heat

December the 12th, the O enter ve, who rules the Knees and Hurts in them, as Strains, Fractures, the Le prosse or Itch.

Cb

Fe

of Sight; if in A, melancholy Blood, putrefied Feavers, à heavinesse in the Heart, Agues, Heart Qualms; if in 2, a Defluxion of subtil, thin, sharp Humors, pains in the Joynes, the Blood over heated by some violent exercise, taking Cold upon it, the diffemper is mixed with a Feaver, a hot tumour in the Grine, or in the Buttock; but if Saspect the Din this Sign also, it is a violent burning Feaver. If the D be afflicted in any Sign of the Aiery Triplicity, as are II, and w, wind in the Veins and Joynes, afflicts the Party, or the Blood that is corrupted all over the Body; if h be the afflicting Planet, and the Din 11, It is a Consumption, or a general wasting; if it be 3, the Blood is wholly corrupted by some sudden accident, wind in the Joynts, pains all over the Body, or a lameneffe in the Arms or Hands; Dafflicted by h in fome Surfer by eating or drinking; or by the act of Venery, pains in the Head and Joynts, or a Sciatica comming from the Running of the Reins, or some other humour; if &, hear in the Reins, caused by Gravel, or the French Pox, the Blood corrupted, or a Surfet; if D' be in afflicted by h, the Party is troubled with Wind, Ri fing of the Lungs, or Fire, happily a fore Throat, or melancholy wearinesse in Mind and Body; if & afflic the Din this Sign, the Blood swells in the Veins, a Fea ver, a pain in the Breast, difficulty in breathing, some hur in the Legs.

Signs, &, m, and X; if in &, the party hath much Flegm in the Stomach, subject to vomit, or hath Cough, or a Surfer by over eating; thus if & afflict the in this Sign. But if hafflict the D, the party is afflict ed with a cold Stomach, distillation of Rheum, roug melancholy Matter in the Breast, slimy thick Flegm

ŭ.

18

1

e

8

18

Cararres, abundance of spicele and moisture, Coughs' ectick Feavers, Agues, a weaknesse in the Reins, and

pain in the Belly, a long Cure.

Din m afflicted by h, Ulcers in the Arsehole or Serers, Dropical Humours in the Knees and Legs, the tone in the Bladder; if a Woman, too many of the Whites or Reds, if a Man, Ulcers in the Yard, the Goorrea; if & afflict, Ulcers in the Secrets, the Pox, or he like, Hemerods, or Pills, breaking out, the Gonorrea, burnt prick.

Din & by hafflicted, a Surfer by Cold, swelling in the Throat, opprest with Flegm, a rotten Cough, and nuch moisture in the Stomach, hurts in the Feet; if & fflict the D, the Body is full of groffe Humours, and subject to a Dropsie, a continual Defluxion unins in the Belly, or a violent Loosenesse.

If D be afflicted in the Earthly Triplicity. subject to a Dropsie, a continual Defluxion of Rheum,

If D be afflicted in the Earthly Triplicity, as are these signs, 8, m, and vo, the Disease came from melancho-

y, as Consumptions, Leproses, dry Scabs.

D in & afflicted by h, thews Ulcers in the Lungs, a welling of the Body, Feavers proceeding from obstructions of the Precordiacks and Arteries, (that is) of the inward parts near the Heart, Liver, and Lungs, or occasioned by too much Luxury; if & afflict the D, it shews too much a blood abounding, continual Feavers, the Body wholly out of Order; pains in the Neck and Throat, the Kings keins, or Gravel in the Kidneys.

D in me afflicted by h, the fickness proceeds from crude Humours in the Stomach, and from too much viscous flegm obstructing the Bowels and Intrals, inordinage feavers, pricking under the Ribs, sometimes the Wind m Cholick with extream melancholy, with the Gour or

Aches in the Thighs and Feet, with obstructions of the Womb; if a atflict, then Ulcerations or Flux of the Belly, small Feavers caused by Choler and Melancholy, the Wind Cholick, weaknesse in the Legs, hard to

be cured.

If D shall be assisted by h or g in vo, the Diseas proceeds from Cold or Melancholy distillations, do Coughs, the Lungs oppressed, more pained in the Nighthan in the Day, the Head-ach, or a noise in the Head if S or O afflict the D in this Sign, it shews no perfect Concoction, Choler abounds, a desire to Vomit, swelling of the Sinews, immediately follows a Flux the Belly, the Blood is exceedingly corrupted, the Patry is Lean, and of an obscure Complexion, little Bloo in the Body, inclining to the Yellow Jandise, inflamations in the Breast, a Cholerick Humour, in the Hands, o Joynts of the Fingers.

Observe the D is said to be afflicted by h, S, O, or swhen she is in D, S, or S, with either of them, and especially if she be posited in a bad House with either of them or they aspect her from bad Houses, as are the sixt, eight and twelsth, or if she be besieged betwixt two of the in any place, or with the S; Note the worst affliction that can happen to the D, is to separate from the Inso tunes, and apply to the Combustion of the Sun, for signifies the Party cannot escape according to Nature.

This I thought good to bestow on young beginners who will not despise the day of small things; some make contented to eat Herbs, and I will give them leave eat strong meat that can get it; this will serve for the time and this place, hoping to give the Lovers of the Science, a better dish if the Lord permit me days.

Pray accept of this breviate as useful to the hands son

fome, though not to all, who have many books at com-

The Use of the former Table.

He first Example shall be of the true time of gathering the Herb Rosa Solis, this being an Herb of the sun, and under the Sign 5.

This Herb is fit to be gathered in June, July, or Angust, at which time it Flowers; Look back to the Table and you shall find Cancer &, who as you may see, contimes in the Ascendent 2 Hours and 12 Minutes, all which time you have to gather the Herb Rosa Solis, or my other Herb, whose Nature is Governed under the Dominion of &; do the same, in gathering those Herbs which are governed by the other Signs (that is) when they begin to ascend, at that time do you begin to gather the Herb which is for your use, but especially if it be offible at the same time, gather the Herb in that hour whose Planet Governs the same Herb, as if it shall be the

the herbRosa Solis gather it at what time & ascends, and also in the hour of the Sun.

As for example.

I would gather the herb Rosa Solis in its vertue to cure some Disease, as the Consumption of the Lungs, or the defects thereof, because the Radical moisture is most Arong in this herb, for Medicine, when the Sun shall be in Conjunction with so or passing through this sign, because the Sun Contains in his vertue the Radical heat of all things moving in the world, And being in & (which is) the Lunar-moisture, having in her vertue, moisture, wherein is contained a falt quickening and nourishing all Therefore when the Sun is in the first face of Cancer, and ascending with the Sun in the same Degree, also in the hour of the Sun, Luna and the Lord of the tenth being in good aspect with the Sun, as a Trine or Sextile, at that very time I would gather this herb, you may easily do on the 19th of June being Sunday 1659 just at Sun-rising, being the day and hour of the Sun, at which time & doth afcend, or on the 21 of June in the second hour of the day, because & rules the first hour of the day, beginning at Sun-rising, and Sol rules the second you may also gather this herb in its vertue just at twelve a clock at noon, at which time the Sun hath his greatef influence upon the earth, from the 18th. day of June untill the 9th. of July, alwayes observing the time of the best aspects of the D O and Lord of the ascendent, and let them allbe strong if it be possible; if you would gather this herb for the fortifying of some man against his ene mies, or to gain favour from Princes or some Court o Justice, let the Sun be in his own house in a in good as red

Pects and in Reception with the Lord of the tenth, and the D moon as aforefaid, make a Sigil of the Sun in fine Parchment under the same influence aforesaid, and inclose this herb so gathered as aforesaid betwixt both the round pattens of parchment whereon the figil of the Sun is made, and sew it in with yellow filk, and let the parties name be written on the sigill with the Characters of the Ascendent, and his Lord with his Angel, and then let him wear it about his neck or in his bosome.

Observe the same Rule in gathering all other Magical herbs, either for Physick or other secret operations, as

AMARA DULCIS, against Witchcraft.

The last thing that I shall do at this time, is to shew you how to erect a figure of heaven, with an example how to discover a disease or hurt, the D being afflicted in the following figure: Feb. 23. h.9. m. 15. a. m. and on Feb. the 23d. die 9 1653. a Urine was brought unto me, the

Question was, What disease, if recoverable.

I only looked in my Ephemerid, for my Ascendent, which I found to be II 5.37. also I beheld the D, and finding the last separating from the greatest unfortune h and he being in the fixt house which is the house of sickness, he going into = by a retrograde motion, also afflicting the Din St, and the in the fourth which fignifies the breast and stomach, and at signifing the heart and back I judged those parts of the body to be most afflicted, and that the man could hardly fetch his breath for pain, I also said that his blood was congealed all about those parts, (that is) from his Hipps to his Arm-pitts, I finding II ascending and & being in conjunction with In a a sign of the same triplicity, with the ascendent, and fixt, and above the earth, I faid he had a humor ferled in his right-arm, for always I do find by experience, whas L 4

what fign so ever doth ascend, on a question of sicknesse, that part of the body is infirm which is signified by that Sign then ascending, if the first part of the Sign ascend it shews the upper part of the member to be infirm, as here the 5th, degree of n ascending shews the grief near the shoulder, if it had been the second face ascending or the 15 degree; it would have signified near the Elbow or middle of the arm; if the last face or latter degrees ascend of any sign it signifies the extremity of that member is offended, which the Sign governeth, as if the last face of n had ascended or the 25. 26. 27.28. 29. or 30. degree should have been on the Cusp of the first, I should have said that the pain had been near the hand or in the hand-wrist, and so judge of the rest of the signs according to their natures, and the member or part of the body which they govern.

If you would fet a figure of heaven for any time of the day or night, when you have your time given by any one defiring a resolution upon some question, you must first seek the place of the Sun in degree and minutes that day at noon in which the question is made, always adding or substracting 15 minutes for every six hours either before or after noon, and add to the motion of the Moon every day at noon three degrees for every six hours; observe this in all questions, where distance of time or place is re-

quired.

And when you have found the place of the Sun in some Ephemeris for that year, month, and day of the month, in which you would erect your figure, afterwards or in the next place, seek the same degree of the Sun, in the table of Houses, under the title of tenth house, in the same sign wherein the Sun was found on the day of the month sought; the degree of the Sun being sound, look directly opposite to it on the left hand, under the title time from

from noon, and h. m. which signifies the hours and minutes given from noon, unto these hours & minutes found under the title of time from noon, and your time given or what it is a clock exactly when the question is made, and if it be under 24 hours seek the number in the table of Houses, and the number being found go directly in a right line towards the right hand, where you shall find the degrees and minutes of the figns which will fall upon 6 of the 12 houses, and the opposite signs and the same degrees and minutes are to be understood, and placed on the other fix Houses, but if the number found shall exceed 24 hours, then you shall cast away 24 hours, and with what remains feek in the table of Houses under the title of time from noon; your number being found go directly in a straight line towards the right-hand, where you shall find the degrees and minutes appropriated to the Cusps of the 10th. 11th. 12th. first or ascendent, second and third houses which are fix of the 12 houses, the other fix are understood as aforesaid. The signs being placed on the Cusps of the 12 houses, you ought in the last place to placethe Planets with the Dragons head & tayl & as you shall find them in sign degree and minute on the day and hour of the year and month in which the question is made, this being done you may proceed to judgement.

As for Example.

I would fet my figure on the Urine brought unto me, February the 23 day & hour 9 minutes 15 A. M. (that is) in the morning 1659.

First I seek the O place degree and minute at noon, which I find to be in X 15 degrees and 2 minutes, the minutes being under 30 always we accept of the Degrees

found, but if the minutes exceed 30 we always add one De-

gree to the Degrees wherein the Sun is found.

Secondly, I look in the table of Houses for Sol in x and roth. House, which I find in the 12th, and last page of the table of Houses, in which line of the 10th. House under x I go downwards till I come to the 15 degree, over against which on the left hand under the title time from noon I find hera or hours 23, minutes 4, unto which I add my time given, which is hours 21 and minutes 15, for fo we count the hours of the day from the noon of one day to the moon of that following: these two numbers being added together makes 44 hours and 19 minutes, I cast away 24 hours, which is the hours of one day, and there remains 20 hours and 19 minutes, which I must seek in the table of Houses, which number of hours I find in the eleventh page, but the minutes being not precise, I accept of the lesser number 17 which we always ought to do, so that over against my 20 hours and 17 minutes in a right line I have for the Cusp of the 10th house 2 degrees of es, and for the eleventh 22 degrees and 4 minutes, and for the 12th. house v 8 degrees 52 minutes, and for my Ascendnet or first house I have II 5 degrees 37 minures, on the second house is 5 2 degrees 22 minutes, the last of the fix houses is the third on the Cusp, of which is \$ 17 degrees and 53 minutes; now as I said before, the other figns who are always opposite to these with the same degrees and minutes are to be understood, and placed on the Cusps of the opposite Houses, which are the fourth, the 5th. 6th. 7th. 8th. and 9th. the figns also are opposite the one to the other, as y to 2, 8 to m I to 1 s to v, A to m and me to X thus V, &, II, S, A, m, Z, ve, m X, } In the same manner the 12 houses are opposite the one

to the other, as the first to the 7th, the 2 to the the 8th, the 3 to the 9th, the fourth to the 10th, the 5th, to the 11th. the 6 to the 12th, as you may see in the following figure; the figns being placed with their degrees and minutes, on the Cusps of every of the 12 houses, I am in the last place to place the seven Planets and the Dragons head Nand tayl & in the figure, in house and sign, degree and minute, as I find them on the 23 of February at noon, I look again for the places of the Planets on the foresaid day, where I find @ Sol to be in X is degree and 2 minutes, which I place in the eleventh house, with x intercepted, for so we call it when a fign falls in any house, and another fign possessing the Cusp of that house, as me after O in a right line I find Luna D in A 3 degrees and 15 minutes, which I place in & near the Cusp of the fourth house, and Jupiter 14 falling in the same sign 3 degrees 54 minutes, I place him after the D moon, also I find h Saturn in = 29 degrees 59 minutes, R or Retrograd as R fignifies, which I place in the fixt house, in the same line I find & in w 27 degrees 58 minutes, which I place in w and the 9th. house. Again I find in the next Columne 9 in 2 15 degrees and 14 minutes; which I place in and 10th. house. I find & in the same sign 17 degrees and 36 minutes, which being more than Venus & I place after the &, last of all I find the Win m 26 degrees 52 minutes, which I place in the fixt house with me intercepted; you are to understand the 29 to be in the opposite sign & and place him with & intercepted So I have erected my figure, you shall in the 12 house. find the Planets in figns, degrees, and minutes, opposite At the Head of the Page the Signs thus.

Having

Having done what I think is necessary, in the last place I shall insert the Figure, for our example, you are to understand, that the Figure 1, tells you that it is the first House, and the Figure 2, shews the second, and so round to the 12th. House.

Latitud. 51. 32. London.

This Figure being erected, we shall add something more to the former Judgement hereof known to us by experience, which may add something to our suture understanding.

This Man was in Corporiture, a full, flrong and lufly Body

f

u

is

d

Body, as II and & in m, in Conjunction with ?, in a Sign of the same Triplicity, and they being Aierydo well fignifie, & oriental, and in Conjunction with &, and in her Terms shews his Fatnesse, he was Tall withall, his Hair a dark brown, Din Sextile to the degrees afcending,

gives comfinesse.

First the Disease was only an accident (that is) he having a lame Horse, he comming unto him trod on his lame foot, at which the Horse falling down; threw him down also, and fell upon him, and bruifed him very extremely, as the separation of the D from h will well fignifie; and his droping betwixt two Signs, also being Retrograde and under the Earth, do well signifie a fall. Also h is in the House of small Cattel, but D being in St, a violent Sign, who signifies Great Beasts, may shew very well that a Horse or the like did give him this accident, that is, a Bruise.

Secondly, the Lord of the Ascendent in Conjunction with a fortune in the tenth, is on fignification of his Recovery, and Cure, also the D in Conjunction with 4 Lord of the seventh, who signifies the Physician to do him good, also both the D, and 14, are in Sextile to the Degree ascending, all which signifies Help, and a Recovery; again Dand Win Conjunction in the fourth House, fignifies the Medicines to be good, and a good end of

the Cure.

The next application of D to the greatest fortune, and they both posited in the very place governing the part of the Body afflicted, signifies the Life to be preserved, and the Recovery of the Sick, all which have proved true; Praised be God.

h, Signifies Falls, Bruises, hurts by wooden Instruments, as to be dry beaten, or the falling of some Ruines

0

th

nfo

tic

un

W

ines, as Houses that are old, Mines, &c.

1, Religious Melancholy, great Cares, or fears of

the threats of the Law, or some great Person.

Knives, Spears, Pitch-forks, Gun-shot, throwing of Stones, Quarles, Fighting, Wenching, and Drunkenesse; alwayes Judge according to the Sign he is in, as if he shall be in Fiery Signs, apt to fight, in Earthly Signs, he is apt to do a mischief secretly, the same if he shall be in the Houses of &, but if in the Houses of &, he wencheth, if in V Vatery Signs, he hurts by Drunkeness, especially if in the House of the D.

O Signifies Hunting, much Riding, hurts by Fire,

Grief by Losses.

Q. Signifies Surfits, Intemperance, Gluttony, pains in the Head, Back, Belly, and Secrets, happily caused by

Venery, and such Foolish Tricks.

May grieve the Party, or something that troubles the Fancy, if a shall be in the Sixt, and is Lord of the ninth, and in my, if h with him aspect the D with an evil aspect, it shows V Vitcherast, or the like.

D, Signifies much Travel, Sweating, and Drunkenesse; these Judgements appertain to accidents, that are either

procured, or happen suddainly.

This is all I intend at present, as an Introduction to what shall follow hereaster, if this shall be well accepted of; but if not, I shall leave something behind me which will happen to the hands of some one or other, but whether he shall be a Wise man or a Fool, that I forbear to Judge; only this I would willingly doe, extend two other Books, the one of Astrology, and the other of Philosophy, having taken the pains, and omitted no

opportunity, for the gaining of very good and excellent

things of this Nature.

As for this present Book, it is like a good VVorkman, who is also an Honell, Sober, Rightons Person, for I doubt not but that it will get Credit and Estimation into what Country soever it shall happen to come, unlesse into such a place, and amongst such, who hate Vertue, Prosit, and Truth, of which this Book is not wanting: for what is contained herein, are most high Medicines largely Experimented, and found prositable to admiration, for which cause after Ages will be ingaged to praise the Lord for evermore, that this Book was ordained for the Light; Therefore be Studious, and Practise without Covetousnesse, do Good freely, Increase in Knowledge, and give God the Glory for all his Gifts, Amen
